

## XXV PELLET STOVE UPGRADE

The XXV castings are now easier to take on and off the stove. The top casting as well as the hopper can now be taken off without removing the side castings. This upgrade is detailed [step by step here](#). We are working on additional upgrades that will make the XXV even more convenient for homeowners.

### In This Edition:

- XXV Pellet Stove Upgrade
- TL2.6 Rear Flue Collar Option
- Harman BioFuel Bulk Hopper
- Discontinued Part
- Warranty Reminder

## TL2.6 REAR FLUE COLLAR OPTION

The new TL2.6 wood stove (prior to serial number 008850219) has an alignment issue which prevents the unit from being converted to a rear vent configuration. We have made a kit which will allow these stoves to be converted and this kit is available at no cost. If a customer needs to convert to rear vent, please contact Order Fulfillment and order a TL2.6 Rear Flue Kit (part number: I-10-857038). All units manufactured after the serial number listed above will be fully convertible in the field without the need for any additional parts.

## HARMAN BIOFUEL BULK HOPPER

The Harman BioFuel Bulk Hopper (part number: I-00-73450) extends the hopper capacity to more than 1,500 pounds of fuel to any unit it is installed on. This convenient option is fully compatible and available on the following units: PB105, PF100, P68, P61, P61A, P38+, PC45 and P43 appliances.

## DISCONTINUED PART

Effective immediately, the following part will be discontinued.

Part Number	Description	Associated Unit
3-21-08619	Distribution Blower	Invincible Pellet Insert

## WARRANTY REMINDER – 90 DAYS IS KEY

Item	Due Date
Submit Claim	All within 90 days of the service date
