DESIGNED | to inspire

XLR

Balanced Flue Gas Fireplace

XLR

The fusion of technology,
innovation and design

The XLR is a modern marvel. Downtown, uptown, and everywhere in between, when looks matter, it's your style. Mix and match with modern décor. A fireplace so cool, it's hot and highly efficient at setting the mood.

Cover photo: XLR shown with Martini front in Ebony with Reflective Porcelain interior liner and basepan installed in a custom, non-combustible wall (not real wood).

Above: XLR shown with Tonic front in Graphite with Log Kit and standard interior liner installed in a custom, non-combustible wall (not real wood).

FRONTS & FINISHES

Define your fire with your choice of Martini or Tonic fronts. Traditional logs, modern black or white beads, glass and reflective porcelain allow you to create the combination of art and fire to accent your décor.

Dimensions above are in centimeters and for reference only. We recommend measuring individual units at installation. Assumes the use of 1,3cm gyprock. Refer to installation manual for detailed specifications on installing this product. Heat & Glo reserves the right to update units periodically. The flame and ember appearance may vary based on the type of fuel burned and the venting configuration used. Photos in this brochure may vary in color and dimension [size] from the actual product.

XLR FEATURES

- IntelliFire™ Plus ignition system provides fuel savings and easy operation
- Zero clearance provides ease of installation and cost savings
- Multi-function remote provides temperature, flame height and start time control, offering true convenience
- Two front options with five color choices each
- Seven media and one log set options
- Two firebox liner options
- CE certified - 0086

INTELLIFIRE PLUS

The IntelliFire Plus Ignition System (IPI Plus) is an advanced intermittent pilot ignition system with memory settings, a programmable wireless control and an optional continuous pilot mode. IPI Plus constantly monitors ignition, ensures safe functioning and helps conserve energy costs.

CONVENIENT OPERATION

Operate the fireplace, adjust the flame height and view the current room temperature all from the comfort of your chair. To protect the little ones, each remote comes with a wall bracket should you wish to locate the remote out of reach, and also activate the child safety start for even more protection.

HEALTHY HEARTH

A completely sealed system, Heat & Glo balanced flue gas fireplaces draw 100% of combustion air from the outdoors and exhaust all combustion by-products back outside, with no affect on indoor air quality. In addition, cold air drafts are eliminated and heat output is maximized. No electricity, power venting or fan are required to operate, eliminating the need for a conventional chimney, and allowing for installation in nearly any room of the home. TR technology, another Heat & Glo invention, allows for venting off the top or rear, providing even greater placement flexibility.
