Dimensions above are in millimeters and for reference only. We recommend measuring individual units at installation. Assumes the use of 10 mm gyprock.

Refer to installation manual for detailed specifications on installing this product. Heat & Glo reserves the right to update units periodically. The flame and ember appearance may vary based on the type of fuel burned and the venting configuration used. Photos in this brochure may vary in color and dimension [size] from the actual product.

COSMO-130 FEATURES

- Balanced flue technology provides a sealed combustion chamber, maintaining indoor air quality
- Reflective black glass interior
- IntelliFire™ Plus ignition system provides fuel savings and easy operation
- 76% efficiency
- Variable flame height and heat output
- Variable speed fan with auto on/off
- Dual 75mm flexible liners allow for easier retro-fit installation
- Multi-function remote provides temperature, flame height, fan speed and thermostat
- GSCS 20181 | AS4553:2008

INTELLIFIRE PLUS

The IntelliFire Plus Ignition System (IPI Plus) is an advanced intermittent pilot ignition system with memory settings, a programmable wireless control and an optional battery backup feature. IPI Plus constantly monitors ignition, ensures safe functioning and helps conserve energy costs.

CONVENIENT OPERATION

Operate the fireplace, adjust the flame height and view the current room temperature all from the comfort of your chair. To protect the little ones, each remote comes with a wall bracket should you wish to locate the remote out of reach, and also activate the optional child safety start for even more protection.

HEALTHY HEARTH

A completely sealed system, Heat & Glo balanced flue gas fireplaces draw 100% of combustion air from the outdoors and exhaust all combustion byproducts back outside, with no affect on indoor air quality. In addition, cold air drafts are eliminated and heat output is maximized. No electricity, power venting or fan are required to operate, eliminating the need for a conventional chimney, and allowing for installation in nearly any room of the home. TR technology, another Heat & Glo invention, allows for venting off the top or rear, providing even greater placement flexibility.

HEAT & GLO

No one builds a better fire

A brand of
Hearth & Home Technologies Inc

Fireplace glass and other surfaces get extremely HOT and can cause severe burns if touched. Do not remove the protective safety screen from the front of the glass. Keep a safe distance away. To learn more visit www.heatnglo.com/fireplacesafety.
