Gas Log Sets

Gas Logs and Hearth Systems

The Best of Both Worlds

Convert your woodburning fireplace with authentic-looking Heatilator® Gas Log Sets and get the look of a traditional, open-hearth fire with the ease, cleanliness and immediate gratification of gas. The robust, realistic flames won't overheat your room, so you can enjoy your fireplace year round.

- **Eco-friendly** and convenient
- Beautifully detailed, **realistic logs**
- **Limited Lifetime Warranty**—the best in the industry!

Gas Log Sets

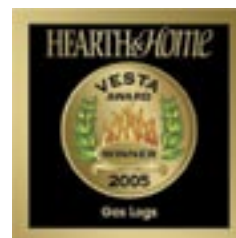

Six distinct log set designs let you achieve the look you want, in sizes to fit almost any firebox. For the most realistic appearance, we recommend selecting the largest logs your fireplace will accommodate. A complete sizing guide is located on the back of this brochure.

Fireside Grand Oak - 24" & 30"

Big, bold and built for larger fireplaces. This 2005 Vesta Winner includes 11 authentic-looking logs, molded from real oak timber, plus a two-tiered burner system for a multi-level fire that easily fills generous-size hearths.

- **Turnkey set contains everything you need**, including steel grate, burner assembly, embers, connectors and more
- **73,000–80,000 BTU input/hour** creates a large, dramatic fire without excessive heat
- **Hidden controls** are easy to access without detracting from the fire's authenticity

Charwood - 18", 24" & 30" (See-through set in 18" & 24" only)

Distinctive charred appearance makes it easy to see how this gas log set earned its name. The Charwood design is also available in a log set specially created for see-through fireplaces to provide a realistic fire from any angle.

Briarwood - 18", 24" & 30"

Larger logs in a natural, tumble configuration create a fuller look inside the firebox that nicely balances the generous gas flames.

Versawood - 18", 24" & 30"

One gas log set with two distinct looks. Change from a full log look with traditional bark detailing to the rustic appeal of a split look with a simple turn of the front logs.

Gas Log Sets

Hearth Kits

Hearth kits go hand-in-hand with your gas log set to complete your fireplace conversion. They include the burner assembly, ember bed materials, clamps, connectors and other hardware, and are available in both natural gas and LP*. All gas log sets must be used with an appropriately-sized hearth kit, sold separately (hearth kit is included with the Fireside Grand Oak). There are three different types of hearth kits to choose from:

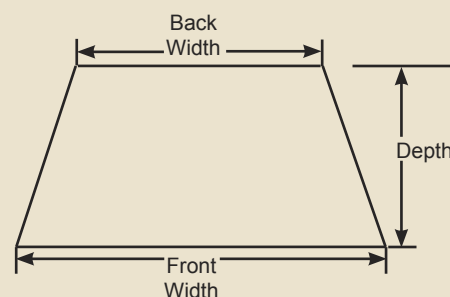

- Matchlight (MTCH)—Utilizes a burner that must be manually lit each time you wish to use it
- Safety Pilot (SPK)—Much like other appliances with standing pilots, once the pilot is lit it should remain at the ready for easy lighting
- Millivolt or Remote Ready (MVT or REM)—Allows you to operate your gas log set through an optional wall control (MVT only) or remote control for the ultimate in convenience

* Matchlight is only available in natural gas

As Easy as 1-2-3

Step 1: Measure Carefully

Take measurements of your fireplace floor as shown in the drawings. Bring these dimensions to your nearest Heatilator® dealer. If you already have a Heatilator® woodburning fireplace, or are purchasing a new model, simply refer to the sizing chart in this brochure to find your specific model.

Step 2: Select a Hearth Kit

Choose a hearth kit that is the appropriate size for your firebox. Remember to keep the three types of burner lighting system in mind to find the hearth kit that suits your lifestyle.

Step 3: Select Your Gas Log Set

Pick your favorite design and ask your Heatilator® dealer to help you make sure it's available in a size that's compatible with your hearth kit.

Mistwood - 21"

Make the most of a small firebox! This attractive oak set features 21" logs that fit an 18" hearth kit to maximize the look of the logs while fitting in smaller spaces.

Real Wood - 18", 24", 30"

This gas log set at a great value includes four basic logs with simple oak detailing for a pleasing look with none of the inconvenience or mess of burning wood.
