

Vent Free Fireboxes

VERSATILE SOLUTIONS FOR YOUR HOME

# ENJOY THE FIREPLACE YOU'VE ALWAYS WANTED

Exacta BUF Series

Available log set may differ from log set pictured.

Monessen offers one of the most diverse lineups of vent free gas fireboxes available, making it easy to find the right look for your home. Enjoy beautiful flames, excellent heating and a customized look with the addition of your choice of Monessen log sets.

## WHAT IS A VENT FREE FIREBOX?

A Monessen vent free firebox is the perfect way to display and operate your Monessen vent free log set. While our log sets can be utilized in an existing approved wood burning fireplace (converted with a gas line), if your home does not already have an existing fireplace, a vent free firebox is an economical way to add a fireplace to your home. Installed in either your wall or a free-standing cabinet, a vent free firebox is simply the metal combustion chamber of a traditional fireplace system, without the log set and engine. You then add the vent free log set (with engine) of your choice to complete it.

## INSTALL IT WHERE YOU WANT IT

Because vent free fireboxes and log sets are designed to be installed and operated without a chimney, flue or vent, they can be installed in locations in your home where it would

be impossible or cost prohibitive to install a vented fireplace. They provide the most economical installation, only requiring a connection to a gas line.

## YOU'RE IN THE CLEAR

Monessen vent free fireboxes allow for zero clearance installation, which means they may be installed flush against any combustible surface such as drywall or wood. This gives you added flexibility and helps save installation dollars when deciding where to install your fireplace, whether on an interior or exterior wall. (It is important to remember that the appliance should be sized to fit the area in which it is to be installed and must meet any additional regional or local requirements.)

## COMPLETE YOUR LOOK

Monessen offers a large selection of vent free log sets (sold separately) that are a perfect complement to your new fireplace. Ask your dealer for details, or visit [monessenhearth.com](http://monessenhearth.com).

## EXPANSIVE VIEWING AREA WITH THE TALLEST FIREPLACE OPENING AVAILABLE

### Lo-Rider LCUF Series

For a true masonry look, the Lo-Rider Series features a low profile hearth, so the firebox appears to nearly rest on the floor, providing the tallest fireplace opening and a truly expansive viewing area.

#### Quick Look:

- Tallest opening available for full view of fire
- Low profile hearth
- True masonry look
- Available facing options include Perimeter Trims, Classic Arched Faces and Cabinet Doors with Screen

#### Interior Firebrick

Refractory Herringbone

#### Cabinet Options

Dark Cherry Wall or Corner Cabinet

(Available for the LCUF32 Only)

Lo-Rider LCUF Series

## SPECIALTY OPTION

### Lo-Rider Designer

The Lo-Rider Designer is available in a see-through model, adding style and warmth to multiple rooms while maintaining a contemporary feel. The louverless design provides a clean exterior for an ultra sleek look.

#### Quick Look:

- Tallest opening available for full view of fire
- Radiant face design with heat circulating air ducts for optional blower
- Low profile hearth
- True masonry look

#### Interior Firebrick

Refractory Herringbone

# FLEXIBLE INSTALLATION OPTIONS

BUF42-R

## Exacta BUF Series

Enjoy the fireplace you've always wanted, expansive views and all. Combined with a Monessen vent free log set, the Exacta firebox provides warmth and ambiance to practically anyone, anywhere. The Exacta delivers maximum airflow, efficiently adding heat to your home, while the zero clearance design gives you flexibility, and helps save installation dollars.

### Quick Look:

- No chimney or venting required makes installation fast, easy, and affordable
- Clean, louverless design
- Tuck the screen into hideaway pockets to reveal expansive views
- Black interior provides elegant background for vent free log set
- Brick interior available for a traditional look
- Large hearth area allows for a variety of log sets
- Angled firebox and uniquely engineered air channels move more heat into the room, maximizing efficiency
- Available in 36" or 42" models
