

Exposure to water can result in irreversible damage to many heating appliances. Hearth & Home Technologies products that have been partially or completely exposed to water, whether by flood, hurricane or leaks are void of warranty and should not be used. As stated in the HHT Limited Lifetime Warranty attached:

This warranty is void if:

- The appliance has been over-fired or operated in atmospheres contaminated by chlorine, fluorine, or other damaging chemicals. Over-firing can be identified by, but not limited to, warped plates or tubes, rust colored cast iron, bubbling, cracking and discoloration of steel or enamel finishes.
- The appliance is subjected to prolonged periods of dampness or condensation.
- There is any damage to the appliance or other components due to water or weather damage which is the result of, but not limited to, improper chimney or venting installation.

We are concerned about the welfare of our customers and want to heat their homes safely and effectively, therefore we recommend that the affected unit be replaced.

If the damage is related to flooding, we recommend checking with your homeowners insurance policy for any benefits related to flooding. There is a Backup of Water and Sewer policy that can be added to homeowners insurance for an additional premium, if the homeowner has this additional insurance, it may help in the cost to replace the heating appliance. Otherwise, flood insurance through FEMA may also assist in funding a replacement heating appliance.
