

## Protect Your Family

Fireplaces provide comfort, warmth and ambiance in any space. As part of its normal operation, the glass front will become hot. It's important to keep children or others from coming into direct contact with the glass front of a gas fireplace or insert. Safety barrier screens help reduce the potential of a serious burn.

At Heat & Glo, we are committed to your safety, and proud of our leadership in product safety. For more than 9 years, we have included safety barrier screens as standard equipment on all Direct Vent gas fireplaces and inserts. Even today, no other manufacturer offers safety barrier screens as standard equipment.

### Call Us to Order a Gas Fireplace or Insert Safety Barrier Screen

Call 1-888-427-3973 so a Heat & Glo® representative can help you obtain the appropriate safety barrier screen.

#### For products manufactured before January 1, 2003:

- We will provide an ANSI-compliant retrofit safety barrier screen free of charge, you simply pay shipping costs.

#### For products manufactured after January 1, 2003:

- We will provide the model number of a replacement safety barrier screen that was originally designed, aesthetically styled and came standard with your product, which can be easily purchased from your local dealer.
- Or, you can choose a generically-styled retrofit safety barrier screen that complies with the new ANSI standard revision that will be effective in 2015. This will be shipped directly to your home for \$99 (USD), including shipping.
