

Log Set Assembly: LOGS-CFXGB

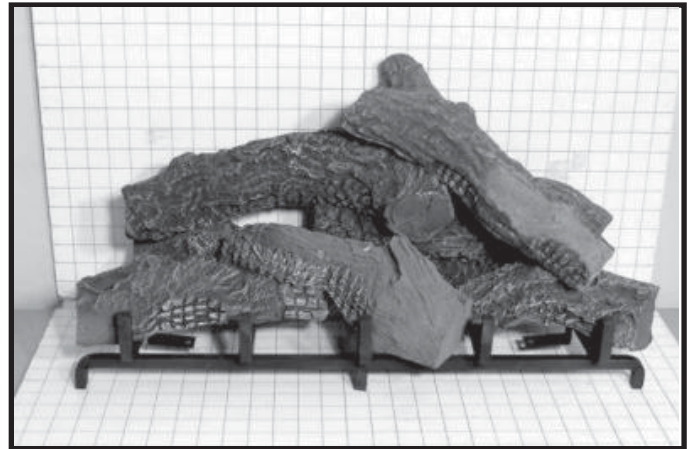

For Models: FB-GRAND-S, QVI35FB-S

LOG PLACEMENT INSTRUCTIONS

CAUTION: Logs are fragile! Carefully remove the logs from the packaging.

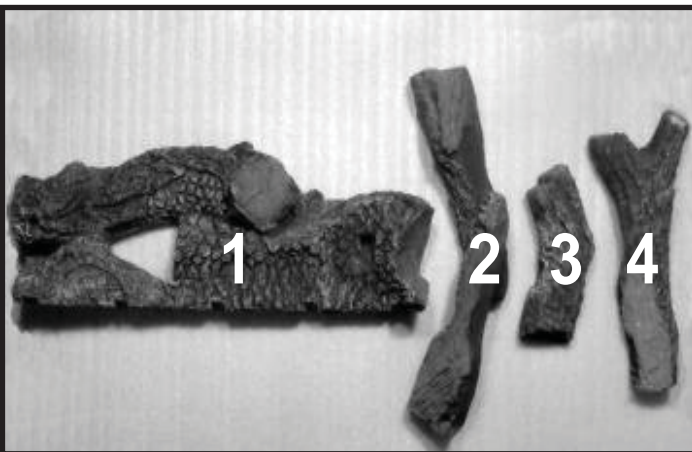

Log Set (QVI35FB-S Shown)

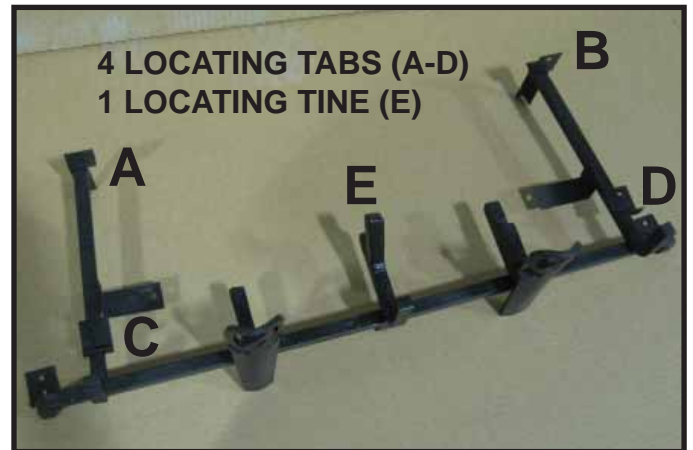

Log Set (FB-GRAND-S Shown)

This model uses locating tabs to positively locate the logs with respect to the grate assembly.

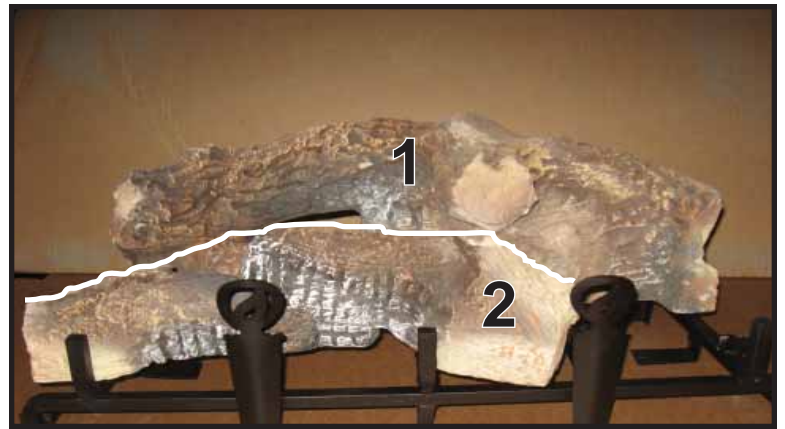

Logs

Locating Tabs

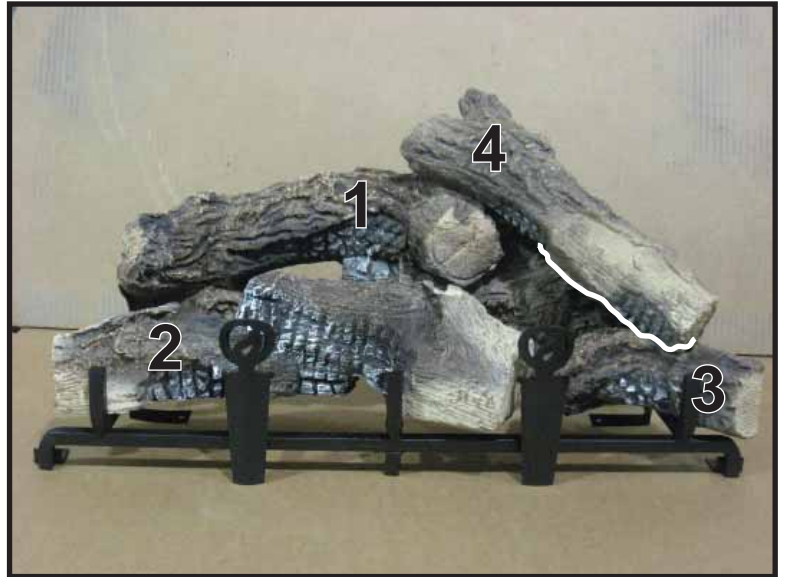

LOG NUMBER 1 (SRV768-701): Place log #1 onto the grate. Push log back until it rests against locating tabs A and B. Slide the log all the way to the left until the notches on the bottom of the log contact the grate bars.

LOG NUMBER 2 (SRV768-704): Position log #2 onto grate such that tab C fits into the slot on the bottom surface of the log. The right side of the log rests between the front grate tine and locating tine E. The cutout on the log should contact the corresponding tine.

LOG NUMBER 3 (SRV768-705): Position log #3 onto grate such that tab D fits into slot on bottom surface of log. Push down until log is sitting flat on grate.

LOG NUMBER 4 (SRV582-705): Place log #4 across both flat spots on log #1 and log #3, with the “Y” in log #4 placed on log #1. The back of log #4 should make contact with the back of the firebox.
