### MODEL

LUX 42" Direct Vent Gas Fireplace

### THE CHALLENGE

The client desired a minimally furnished home, both functional and elegant, for a family weekend ski retreat. The project required a fireplace as both a focal point and to provide supplemental comfort.

### THE PROJECT

Looking through the glass window-walls and across the roof decks to spectacular views, it's easy to understand why this contemporary mountain home is called the Penthouse.

The exterior features a combination of rock, wood, stucco and steel that lets the custom architecture stand out. Detailing is sophisticated and distinctive – blending natural elements with steel and glass, enhancing the contemporary architecture while still appearing at home in the mountains.

There are two master suites, boys' and girls' bunk rooms and an additional guest room. A craftsman wine cellar on the first floor and an additional living room on the second floor with ski-in access to nearby hills make this home functional and spacious. All levels are accessed by a stunning staircase and an elevator.

The lighting design is bold and fashionable, featuring fixtures by acclaimed designers Ingo Maurer and Jeremy Cole.

A highlight of the home is the great room on the third floor. Warm, neutral colors echo the natural surroundings and lend softness to balance the clean, modern lines. An eye-catching hearth was desired as a dramatic focal point, and the LUX gas fireplace by Heat & Glo served perfectly as the striking showpiece the room needed.

Donna McAlear, the interior designer for the project, explains her vision. "We designed the overall stone veneer fireplace mass so that it visually and physically wraps from inside the open-plan living room wall around to the exterior deck. The fireplace mass is a dominant and central architectural feature that's key to the open-plan living, dining and kitchen space.

This luxurious vacation retreat required a fireplace model that would match the interior aesthetic and provide the right level of supplemental warmth to the space it served. On the outside deck, a gas barbecue station was designed directly behind the Heat & Glo unit to make efficient use of the gas line location.

# LUX

DIRECT VENT GAS FIREPLACE

Colorful flames rise through beautifully sculpted metal. A reflective black glass interior multiplies the fire and radiates the flames. Exclusive finishing options coupled with these beautiful stainless steel gas fireplaces allows you to create modern art, on fire.

- 36" and 42" models
- Anti-reflective glass provides 89% glare reduction

LUX 36

LUX 42

MODEL	LUX36	LUX42
A	61" [1549]	67" [1702]
B	35-7/8" [911]	41-7/8" [1064]
C	39-7/8" [1013]	45-7/8" [1165]
D	31-1/16" [789]	36-1/16" [916]
E	57-5/8" [1464]	62-5/8" [1591]
F	54-15/16" [1395]	59-15/16" [1522]
G	41-3/8" [1042]	46-3/8" [1178]
H	59-1/4" [1505]	65-5/16" [1659]
I	16" [406]	16" [406]
J	29-5/8" [752]	32-11/16" [830]

## MODERN FAÇADE

*Left: A dramatic and modern stainless steel door for the front entry. The dark-sky sconces are hand-forged wrought iron.*  
*Center: The clean lines and contemporary architecture illuminated against a Rocky Mountain evening.*  
*Right: Window wall systems help connect the interior environment to its natural surroundings.*

---

## UNIQUE FINISHES

*Left: The elevator column is clad with the same mountain ash stone veneer as the home's exterior.*  
*Center: The barrel table and stools in the wine room are constructed from recycled oak wine barrels.*  
*Right: High-gloss, cherry wood cabinets in the master bath echo the hue of the adjoining master suite's ceiling.*

---

## CUSTOM SPACES

*Left: The level two family room, an area for children and their friends.*  
*Center: European oak base cabinets are topped with quartz countertops in the third level kitchen.*  
*Right: Taupe reflective glass cabinets in the kitchen float on a radiant, random-patterned, custom glass mosaic wall treatment.*

#### 1. ROOM SIZE

The larger the room, the larger the fireplace you'll want to use to keep this critical focal point proportionate with its surroundings. The size of the space will also determine the BTU output of the model you specify, ensuring your fireplace provides the right amount of supplemental warmth.

#### 2. SHAPE AND STYLE

From circular to linear, don't be afraid to explore nontraditional models to add a dynamic statement to your interiors.

#### 3. HEARTH HEIGHT

Mid-wall applications work particularly well for modern style units. Placing the fire at sitting eye level achieves maximum impact.

#### 4. MEDIA OPTIONS

The inside of your fireplace is your canvas. Use logs, river rock, glass media, and unique burners to match the fireplace you specify to the decor theme of the room.

#### 5. FUSION DESIGN

Pair a modern fireplace with a traditional element, like a classic wood mantel, to create a bold aesthetic.
