

## Stone Placement: SOHO24B

- Installation Instructions -

**WARNING! Choking Hazard!** Keep stones out of reach of children.

**Figure 1.** For proper performance and safety, it is critical that the Black Onyx stones are set up in accordance with these instructions. As you are positioning the stones, make sure that no stones are in the cross-hatched area shown between the two arrows above. This is to ensure proper lighting and avoid interference with the pilot flame.

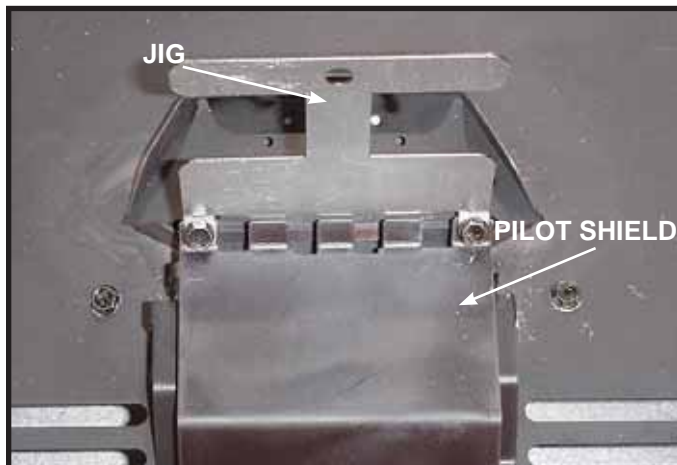

### ⚠ WARNING

#### Delayed Ignition Risk

- Place stones according to instructions.
- Do NOT place stones in area in front of pilot shield.
- Do NOT place stones in a position that they may fall into area in front of pilot shield.
- Do NOT use any media other than the stones supplied with this fireplace.

Fireplace will not function properly.  
Delayed ignition may occur.

**Figure 2.**

**Step 1.** The included stone placement jig MUST be used any time stones are placed on the burner to ensure that none end up in the cross-hatched area noted in Figure 1.

**Figure 3.**

**Step 2.** The stone placement jig is shipped in its proper position. Remove the two screws securing the jig, making sure the jig stays in the proper position. See Figure 3.

**Figure 4.**

**Step 3.** Place a single layer of stones over the burner area inside of the tabs surrounding the burner and behind the pilot shield.

**Figure 5.**

**Step 4.** Place the remaining stones over the basepan taking care not to add more stones to the burner area.

Figure 6.

**Step 5.** Carefully place a layer of stones over the pilot shield to disguise it.

Figure 9.

**Step 8.** This is a view of the front area of the pilot shield. This area must be free of stones for safe operation.

Figure 7.

**Step 6.** Spread the stones out evenly. Double check that there is only one layer of stones on the burner area and that the cross-hatched area in Figure 1 is still free of stones.

Figure 8.

**Step 7.** Carefully remove the stone placement jig making sure that no stones fall into the pilot area.
