Please consult the manufacturer's installation manual for all details and requirements before making a final design layout decision.

Please consult the manufacturer's installation manual for all details and requirements before making a final design layout decision.

BEFORE FRAMING, PLEASE NOTE:
A minimum of 30" of vertical venting is required before attaching any elbow to the appliance.
**FRONT DIMENSIONS**

- Rectangular holes on bottom of access panel should be covered.
- Approved for 0”-4” finishing material on inside fit method
- If finishing materials are 0-1” thick, the outer trim ring should be adjusted out so that the trim ring overlaps the finishing material. This is intended to provide the cleanest look.
- If finishing materials are 1-4” thick, install the trim ring all the way in and place finishing material over the trim ring.

**FINISHED OPENING DIMENSIONS**

- Inside fit method (Clean Face Trim)
**Specifications**

**APPLIANCE LOCATION**

Refer to Section 10 of install manual for hearth, mantel and wall projection information.

If a Passive Heat, Heat-Zone or Heat Out will be installed, refer to Section 6 of install manual for instructions.
