* Frame down to fireplace after unit is installed.
** If the inside of the framed cavity is to be finished, the framing dimensions must include the finished surface. If drywall is to be attached to the rear wall, the depth must be measured from the drywall surface. Add 9 1/4 inches to framing depth for an elbow vented off the rear of the appliance.

* Shows center of vent framing hole for top or rear venting. The center of the hole is 1" [25 mm] above center of the horizontal vent pipe.
