- 2-1/16” [52]

- *Minimum Vent Height (using SLP90)*

*Framing depth will change if installing PVLP-SLP with a minimum vent configuration. See next page for details.*
PVLP-SLP MINIMUM HORIZONTAL FOOTPRINT

This diagram shows the scenario if the 12-1/2 inch measurement was not accommodated for prior to installation. The PVLP-BEK may be installed in the 5 inch gap or a small bump out may be created on the exterior wall to accommodate for the additional space needed.

$H^* = 12-1/2$ inches if using PVLP-SLP plus one SLP elbow. This is the minimum vent configuration and is composed of the factory-installed 6 inch DVP component, DVP-2SL converter, SLP90 elbow and PVLP-SLP termination cap.

The dimensions above assume:
- 2 in. X 6 in. exterior wall studs
- 1/2 in. thick interior and exterior wall sheathing material
Finish Dimensions

FINISHED OPENING DIMENSIONS

NOTE: Sheetrock (1/2") may be installed up to appliance opening.

Clean Face Finish (Black Glass Interior)

Black Granite Surround Finish (Black Glass Interior)
Specifications

MINIMUM FIREPLACE CLEARANCES

11 14 17 31

1 1 1/2" SHEETROCK/COMBUSTIBLE FACING MATERIAL

MEASUREMENTS FROM TOP EDGE OF THE OPENING

29-3/4" [756]

Appliance may be installed off the floor**

* Adjust framing dimensions for interior sheathing (such as sheetrock)
** Header depth not to exceed 3-1/2"
*** If appliance is installed off of floor, maintain required clearances to combustibles. Construct platform in accordance with local building codes.
**** See location diagram at top of page for PVLP-SLP minimum horizontal footprint. Rough opening depth will change if installing PVLP-SLP with minimum vent configuration.
