

A SMARTER WAY TO LIGHT YOUR FIRE

Innovative. Convenient. Energy Efficient.

SIGNATURE
COMMAND™ SYSTEM

THE BEST COMBINATION OF INNOVATION AND ENERGY EFFICIENCY

The Signature Command™ System is the most feature enhanced and energy efficient collection of fireplace components on the market today. With innovative options like cold climate pilot selection and the Smart Mode® feature, your fireplace will operate at peak efficiency, helping you conserve energy and save on fuel costs. Plus, features like automatic battery backup put the best of modern convenience at your fingertips. Enjoy your fireplace like never before with a unique combination of benefits you'll only find with Signature Command.™

■ Conserve energy and save on fuel costs

Smart Mode thermostat option

For increased convenience and energy efficiency, the Smart Mode thermostat option monitors the temperature in the room and automatically adjusts the three-step flame height and/or blower to maintain the optimal level of comfort. That way, your fireplace uses only the energy it needs, helping you save money on fuel costs. Let Smart Mode do the thinking for you while you sit back and enjoy the comfort of your fireplace.

Smart Mode is available with two touch screen remotes: TSTSC, TSFSC

■ Efficient options for your lifestyle

Pilot selection options

In cold climates, flues must be kept warm, so the pilot must remain lit. However, this isn't necessary in warmer climates or if you don't use your fireplace six to eight months of the year. Our pilot selection options let you take advantage of the energy efficient intermittent pilot, which can help you save up to \$200 a year on fuel costs.

■ Uninterrupted fireplace operation

Automatic battery backup

Enjoy added peace of mind with automatic battery backup. Since the batteries are already in place and ready to go, when the power goes out, your fireplace stays on! On other models, you have to insert the battery at the time of the power outage. With automatic battery backup, you won't have to fumble in the darkness with a flashlight or get down on the floor by the fireplace to install the battery.

DISCOVER THE LEVEL OF CONTROL THAT'S RIGHT FOR YOU!

Choose from two Signature Command Systems

The Signature Command System

With our touch button Command Center, you can conveniently control all your fireplace functions and options from a central location. Easily accessible from the front access panel of the fireplace, everything you need is at your fingertips. And, unlike many competitors' systems, which require A/C to function, the Signature Command system can be installed where no power is available, making it more convenient than ever to enjoy the fire.

Features:

- On/off three-step variable flame height adjustment
- Automatic, uninterrupted battery back-up during power outages
- Pilot selection option — choice of cold climate standing pilot or the energy efficient SC intermittent pilot
- Memory shut off remembers your favorite setting the next time the fireplace is turned on
- Convenient diagnostic code indication lights
- Built-in remote receiver for the option to easily add a remote control

The Total Signature Command™ System

This system features the added benefit of the energy efficient Smart Mode thermostat, touch screen remote and A/C accessory model for added control features. In addition, it adds the ability to control the rear burner shut down feature (on select fireplaces) so you can enjoy the ambience of a beautiful fire while lowering heat output when it is not needed. It's the most feature enhanced and energy efficient fireplace control system around.

Features:

All the features included with Signature Command, PLUS:

- Smart Mode thermostat for enhanced energy efficiency
- TSFSC Full Function Touch Screen remote control
- Rear burner shut down feature lowers heat output as much as 70% for ambience when heat is not needed (on select fireplaces)
- A/C accessory model for added control features

ACCESSORIES

■ Convenient Wall Control

Say goodbye to bending and stooping! The wall control allows you to mount the Command Center to give you total control of your fireplace from one convenient, upright location. Everything is done with just a touch of a button right from the wall. Requires wall mounting kit SCSWEK.

■ Optional A/C Accessory Module

The A/C accessory module gives you control of three optional features powered from the (TSFSC) Full Function Touch Screen Remote. This accessory module comes standard with the Total Signature Command system and may be added as an accessory to the Signature Command system. For use with 120V fireplaces with the Signature Command System.

Features:

- Three-speed blower control and time delay setting for optimal comfort and efficient heating
- Accent lighting with three levels of adjustment
- On/off auxiliary control for extra 120V A/C accessories like ceiling fans, waterfalls or accent lighting

REMOTE OPTIONS

The Signature Command optional remote controls require no installation, just touch and point to use your new remote control. Signature Command remotes come in a wide variety of choices to match the way you want to control your fireplace. Just sit back, relax and realize optimal comfort as you control all the features and functions of your fireplace right from your couch.
