Invigorate a space with a twist on tradition. The Everest’s upright design elevates your fire, reaching new heights of fireside appeal.
FIRE FROM WITHIN
It’s a stunning fire. But take a closer look. An innovative burner design produces flames from within the logs, creating depth and adding intensity.

UPRIGHT STYLE. DOWNRIGHT PERFORMANCE
Showcase the style and feel the heat. The shallow footprint of the Everest radiates more warmth out into the room, quickly and effectively.
**TECHNOLOGY**

**INTELLIFIRE™ IGNITION SYSTEM**
The Intellifire™ Ignition System (IPI) is an advanced intermittent pilot ignition system. IPI constantly monitors ignition, ensures safe functioning and conserves up to $10/month in energy costs.

**DIRECT VENT TECHNOLOGY**
Direct Vent fireplaces remove 100% of combustion exhaust and odors outside of the home. These sealed fireplaces provide optimal heat, conserve energy and ensure clean, safe indoor air quality.

**HEAT-ZONE™ TECHNOLOGY**
Draw heat from the fireplace into another room of the home, up to 20 feet away. When a Heat-Zone kit is run continuously, it will redirect up to 25% of the fireplace’s heat to another area, thus reducing wall temperatures above the fireplace. Two heat zones run continuously will redirect up to 50% of the fireplace’s heat.

Dimensions in diagrams are in inches and millimeters. Dimensions in table are in inches. Product information is not complete and is subject to change without notice. Product installation must adhere strictly to instructions shipped with product. We recommend measuring individual units at installation. Assumes the use of 1/2” sheetrock. NOTE: Combustible material should not cover the face. Make sure you do NOT cover the decorative door opening. Refer to installation manual for detailed specifications on installing this product. Heat & Glo reserves the right to update units periodically. The flame and ember appearance may vary based on the type of fuel burned and the venting configuration used. Actual product appearance, including flame, may differ from product images.

**EFFICIENCIES**

EnerGuide (CSA P.4.1-15) EnerGuide is a rating used in Canada to measure annual fireplace efficiency.
