FIRE
NO ONE BUILDS A BETTER FIRE.
THE PURSUIT OF INNOVATION

Heat & Glo is fueled by innovation and driven to prove “No One Builds A Better Fire.” The brand was founded in 1975 in a small Minnesota garage by brothers Ron and Dan Shimek. In 1987, the brand introduced Direct Vent technology—forever changing the way fireplaces function.

Much has changed since its beginning. Yet much remains the same. Today, Heat & Glo continues on an endless pursuit; pushing the boundaries of where fire can go and how it can look.

DESIGN
Design is an integral part of form and function. With Heat & Glo, meticulous product development creates cutting-edge designs with creative applications. An expansive breadth of offerings is available. From traditional to ultramodern. With more than 40 models and countless styles.

INNOVATIVE TECHNOLOGY
Heat & Glo holds the most patents, honors and awards in the industry. The brand created fire from water, and also developed exclusive technologies like FireBrick® and IntelliFire™ Touch. Heat & Glo is always pushing the envelope with technology for today, and innovation for tomorrow.

HEAT & GLO MAKES SPECIFYING SIMPLE

Have confidence in your plans by leveraging our array of design and specification tools including proprietary CAD drawings compatible with the latest AutoCAD software, and 3D Revit BIM objects and families. Heat & Glo also has complete 3-Part CSI/CSA fireplaces specifications for you to add instantly into section 10-31-00 of your construction documents.
DESIGN CONSIDERATIONS

The placement of the fireplace is critical to specifying the right fireplace for the right project.

EXTERIOR WALL
A classic application that suits both traditional and contemporary fireplace models. These applications typically require the least complicated vent runs, but may require an exterior chase or bump out.

CORNER
Best used in floorplans with square footage to spare or where other architectural elements (i.e. windows) take precedence as a focal point. Traditional models or smaller modern linear units work best for these applications.

INTERIOR WALL / ISLAND
An interior island application is an innovative way to enhance a space. See-through models are highly desired for these types of design, particularly in open floorplans. These applications may require a power vent system and a more complex vent run.

Install Virtually Anywhere: Power Vent™ Technology
Fireplaces aren’t just for exterior walls. A fan-powered accessory with slim venting can zigzag throughout your home – up, down, over or under – making it possible to install a gas fireplace virtually anywhere.
SPECIFICATION CHECK LIST

Planning is critical to ensure the model you are specifying will work with your construction plans. When specifying a fireplace model for your building, make sure to work with your local Hearth Expert to factor in the following factors:

FRAMING DIMENSIONS
For both the fireplace itself and for any vent pipes that must terminate through a wall.

CLEARANCES TO COMBUSTIBLES
For mantels, surround material and appliances above the fireplace.

CONNECTION REQUIREMENTS
Make sure you understand where venting, gas and electrical connection points are on the model you’re specifying.

VENT RUN REQUIREMENTS
The maximum and minimum lengths required for vertical, horizontal and mixed vent runs may vary from model to model. Understanding these parameters early on is essential in deciding where best to place the fireplace in your plans.

EXTERIOR TERMINATION LOCATION
Know the distances needed from the termination cap to nearby windows, overhangs, soffits and sidewalks.
KEY TECHNOLOGIES

DIRECT VENT TECHNOLOGY
Direct Vent fireplaces remove 100% of combustion exhaust and odors outside of the home. These sealed fireplaces provide optimal heat, conserve energy and ensure clean, safe indoor air quality.

POWER VENT™ TECHNOLOGY
A power vent is a fan-powered accessory allowing for longer more complicated vent runs – making it possible to install a gas fireplace virtually anywhere in a property.

WHISPERTONE™ TECHNOLOGY
Patent-pending system which allows airflow with minimal sound, the ability to horizontally terminate, and an automatic damper which stops air movement when the fireplace is off, thus preventing cold air infiltration into the home.

INTELLIFIRE® IGNITION SYSTEMS
Advanced intermittent pilot ignition systems with memory settings and programmable RC300 or RC400 remote controls. IPI systems constantly monitors ignition, ensures safe functioning and conserves up to $10/month in energy costs. Options Include IntelliFire, IntelliFire Plus and IntelliFire Touch.

FIREBRICK® TECHNOLOGY
FireBrick is a patented, energy-saving ceramic material molded in a variety of masonry designs. FireBrick produces up to 25% more radiant heat than metal fireboxes – heating rooms faster and using less fuel. This increases efficiency and reduces heating costs.

PRODUCT FEATURES

BLACK GLASS  LED EMBER BED  ANTI-REFLECTIVE GLASS  LED ACCENT LIGHTING  BLUETOOTH  HIGH-DEFINITION LOGS
HEAT MANAGEMENT SOLUTIONS
Increase homebuyer satisfaction by specifying a model with heat management.

**HEAT-ZONE® KIT** Draw heat from your fireplace to another room in your home, up to 20 feet away. Redirect up to 50% of the heat, while reducing wall temperatures above the fireplace.

**HEAT-OUT® KIT** Draw heat from your fireplace and direct it outside. Redirect up to 40% of the heat while reducing wall temperatures above the fireplace.

**PASSIVE HEAT™ KIT** Allows heat to disperse naturally (no fan) into the room, reducing surface temperatures. Choose side, front or open wall register.
TRADITIONAL GAS FIREPLACES
WHY A GAS FIREPLACE?
Gas fireplaces offer the most versatility of placement, model variety, and technology. A gas fireplace will not only add an unforgettable focal point to your space, but ambiance and comfort to the properties you’re creating. Gas-burning fireplaces are clean and efficient. Building and design professionals should add at least one in entry-level new construction homes and a second or third fireplace when planning move-up or luxury/custom properties.

Both indoor and outdoor fireplaces remain in the “Top 5” decorative product features by homebuyers.
- 2017 Homebuyer Housing Preferences across Generations, NAHB

Indoor fireplaces are the “#1 must have” home feature for homebuyers.
- 2016 Realtor.com Homebuyer & Realtor Research

Fireplaces, both indoor and outdoor, are one of the top most sought after features by homebuyers and realtors.
- 2016 Angie’s List Homebuyer & Realtor Research

Fireplaces/firepits are the #1 most popular outdoor design element.
- 2018 American Society of Landscape Designers Annual Residential Landscape Architecture Trends Survey

1 2016 Realtor.com Homebuyer & Realtor Research, “Fireplace is the #1 Must Have Home Feature”; 2016 Angie’s List Homebuyer & Realtor Research, “Both indoor and outdoor fireplaces are one of the most sought after home features by both homebuyers and realtors”
2 Marshall & Swift Residential Cost Handbook
3 2013 NAHB “What Homebuyers Really Want”
PHOENIX
TRUEVIEW GAS FIREPLACE

Designed with a large glass-free view and the authentic look of a traditional wood fireplace. Be captivated by the beautiful hand-painted logs, glowing LED ember bed and bold flames in a traditional brick or modern reflective black glass interior. Safely place a TV 12” above the opening with no mantel required. Set the mood with mild heat for year round enjoyment, and stream music or the sound of a crackling fire through Bluetooth® speakers for a truly immersive experience. Phoenix. The convenience of gas without the glass.

TECHNOLOGIES/FEATURES
MODERN GAS FIREPLACES
MODERN STYLE, TIMELESS APPEAL

The move to modern fireplaces is a trend that’s here to stay. From sleek, modern linear fireplaces to unique models with dazzling features, our line of modern fireplaces will help you create an “impact wall” for your clients that will be the envy of the neighborhood. Make sure to specify a model that matches your project goals – select premium models for luxury properties and mid-range or basic models for move-up and entry-level homes.

PREMIUM
Perfect for mid-size to large rooms and commercial buildings. The combination of seamless, clean-finish options, very active flame, multi-colored LED lighting and standard accessories and heat-management technologies make these fireplaces one of a kind.

MID-RANGE
Works great for mid-size to large rooms. Comes standard with LED lighting, wireless control, and an active flame. Multiple customizable options to fit any type of room.

BASIC
Basic modern fireplaces are ideal for small to mid-size rooms. Calm flame, modest heat output, and optional accessories complement your décor.
Warm up to our most luxurious fireplace yet. Where intricate modern styling meets innovative heating technology. Defying convention and designed for the spotlight. There’s a reason we call it the PRIMO.

TRADITIONAL WOOD FIREPLACES
WHY A WOOD FIREPLACE?

Heat & Glo wood burning fireplaces are a robust, reliable and budget-friendly alternative to true masonry fireplaces and are ideal for projects where the hearth is used seasonally or when end-users are seeking the hands-on experience of a wood-fueled appliance. It’s important to understand local codes when specifying wood burning models, particularly when seeking to comply with EPA requirements and other state and city mandates.

Termination Requirements for Wood Burning Fireplaces

The quality of the fire depends on where you design—in the chimney and termination components for the specified wood-burning model. It’s important to get with a local hearth installer early in the design process to ensure proper termination placement. Variables such as roof angle, prevailing wind location, and nearby overhangs, objects and openings may need to be taken into consideration.
The Rutherford Series offers robust performance and the appearance of a custom-built masonry fireplace – all at a fraction of the cost. Whether a crackle or a blaze, the Rutherford delivers a bold statement in your favorite room.

ELECTRIC FIREPLACES
WHY AN ELECTRIC FIREPLACE?

A fast growing hearth category, electric fireplaces are an excellent option when no other fuel sources are available or when venting gas or wood fireplaces would be difficult.

EASY AND ECONOMICAL

Electric fireplaces provide a unique focal point without expensive installation costs as they require no venting. At an entry price point and costing just pennies a day to operate, they are an ideal hearth solution to specify for any residential or commercial space. Ideal as a second or third fireplace, electric fireplaces can be installed in any room of a property.

HEAT OPTIONAL

The heat output of electric fireplaces can be adjusted or turned off altogether – an excellent solution for projects where the ambiance of a fire is desired without the supplemental warmth. Specify electric models when building in warm climates or for spaces that would benefit from a heat-optional function.

ENVIRONMENTALLY FRIENDLY

Electric fireplaces emit zero combustion by-products and are allowed in all national green building programs.
Adding the traditional look of a fireplace to your home has never been this easy. A detailed masonry-style interior, textured log set and four different flame intensity levels enhance the appeal of the SimpliFire Built-In electric fireplace series. Enjoy the ambiance – with or without the heat. Experience “Fire Made Simple.”

OUTDOOR FIREPLACES
WHY AN OUTDOOR FIREPLACE?

Adding a fireplace to your outdoor space design will extend its seasonality and deliver a vibrant feature for which your clients will clamor. Designed specifically to withstand the elements, outdoor fireplaces come in a variety of styles to suit the goals of your clients and end-users. Incorporate into your exterior building envelope or as an attractive free-standing island application.

Outdoor fireplaces are in the **TOP 5** most essential and desired outdoor home features¹.

Fire features are the **MOST POPULAR** outdoor design element².

90% of real estate agents say an outdoor fireplace increases a home’s value³.

70% of design and build firms report an increased demand for outdoor living space⁴.
