ELECTRIC Fireplace Guide

SimpliFire®

Heat Optional, Style Guaranteed

SimpliFire® electric fireplaces bring the feeling of fire into your home with zero fuss. No venting. Simple assembly. Beautiful flames and embers that turn on with the touch of a button or voice control. From cozy corners to spacious rooms, they're made to meet you where you are, in whatever style feels like home.

Triton 78" left corner with Birch logs

It All Starts Here

SimpliFire electric fireplaces are made to meet you where you are. Whether you're warming up a cozy corner or creating a centerpiece for your space, here are a few helpful things to think about:

How do you live? Are you hosting the holidays? Cozying up every weekend? Designing your first home or downsizing into your favorite one yet? Your lifestyle helps determine the best features, like heat output, control options and built-in effects.

What size is your space? Our styles range from classic square shapes (25–36" wide) to sleek linear designs (43–78" wide and beyond). Think about what feels right for the scale of your wall. We have options that can be built in for a clean look, mounted on the wall or that simply slide into place.

What's your style? One of the best features of electric fireplaces is easily changing flame and ember bed colors. But you'll also want to consider the overall look, whether your style is more minimalist and modern or warm and rustic. Options range from contemporary glass to built-in traditional.

Inception with Halston front and Wescott Mantel Kit

Finding the Perfect Fit

Create a balanced, intentional look with a fireplace that's large enough to be a focal point, but not so big that it overwhelms your space. Also consider surrounding elements like built-in storage, TVs, or artwork. If the fireplace will share space with these, aim for a size that visually balances everything, not just the wall alone.

Here are a few tips:

- Smaller walls (under 8 feet wide): A fireplace around 30–50 inches wide usually works well.

- Medium walls (8-12 feet): Go with something in the 50–70 inch range.

- Larger walls (12+ feet): You can go 70 inches and up, and even link multiple Triton fireplaces together for custom length.

Make It Your Own

The beauty of electric is personalization. With a variety of heat options, flame and ember bed color choices, and controls at your fingertips
or voice, any fireplace you choose from us will deliver a fireside experience that can be tailored to your preferences.
