Open Hearth

Take your project to the next level of luxury

Experience the brilliance of an open flame, expertly engineered to be installed on nearly any wall. The safety, performance and premium aesthetics of the Enlight Linear Open Hearth collection rise above the rest – for an authentic fireside experience, without limitation, that's only possible with Stellar by Heat & Glo.

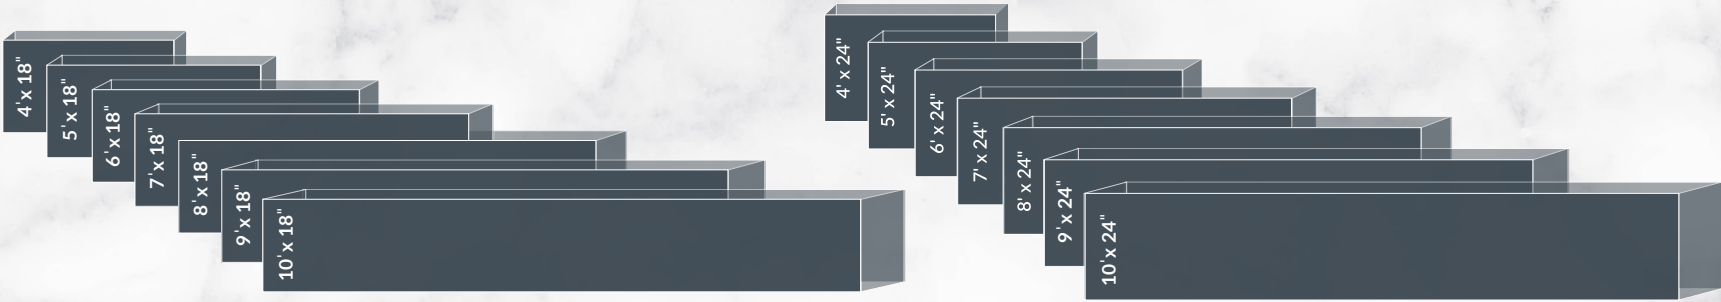

Above: Ten foot Stellar Enight double-sided linear open hearth with natural rocks and oak logs. TV may be placed as close as 6" from the opening.

Single or double-sided* options

Add the Enight Linear Open Hearth in any residential or commercial setting with your choice of size, configuration, and single or double-sided design.

14 base sizes

*Double-sided only available in 18"H

Custom configurations

Every project can have an Enlight Linear Open Hearth when you take advantage of custom sizing with Stellar. Modify length and height down to the inch and place the fireplace exhaust almost anywhere. Unique, customizable burner shapes also available.

Yes, we can do that

We'll tailor the Enlight Linear Open Hearth fireplace to your project. Our team removes all the encumbrances of a traditional fireplace to preserve sightlines. We can vent the fireplace sideways or downward with no chase.

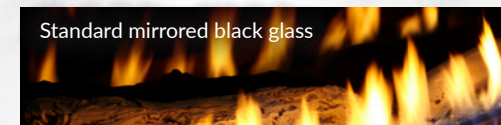

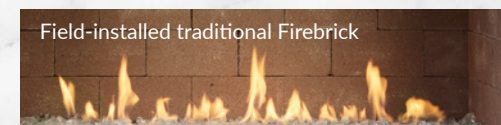

Premium interior aesthetics

The large, glass-free view creates an immersive experience of arguably the boldest flames in the market (20,000 BTUs per linear foot – unmatched in the industry). Choose from a variety of options for either a more traditional or modern look and enjoy the cleanest finish available with no exposed metal to spoil the view.

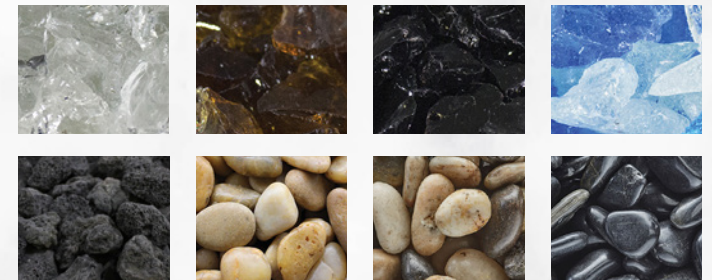

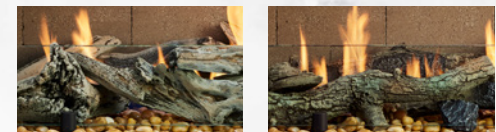

Interior liners

Choose from standard mirrored black glass for a modern look or reflect your clients' exact style with a field-installed interior liner. Can be a maximum of two inches thick and must be a non-combustible material.

Media options

- Ceramic driftwood & oak logs
- Crushed glass
 - Crystal (standard)
 - Copper
 - Black
 - Caribbean Blue
- Polished stone
 - Lava
 - Mixed
 - Gold
 - Black

Above: Create a one-of-a-kind focal point with custom-selected stone, which can be wrapped completely around the firebox for a seamless look.

As safe as it is stunning

With industry-leading technology and safety, there's simply no competing with Stellar. Features like the fail-safe system and automatic intake damper enhance safety performance so you can confidently specify the Enlight Open Hearth for any residential or commercial application.

Trusted performance & safety

- Place TV or other combustibles as close as 6" above the firebox opening
- UL-listed
- Commercial-grade components
- Engineered as a complete unit (no on-site assembly needed)
- Fail-safe system built into pressure differential switch with automatic shut-off
- Patent-pending non-mechanical damper automatically opens for operation and closes to mitigate cold air drafts when not in use

Easy to specify

- 110 feet max venting (11 elbows) for size and placement versatility
- CAD, Revit BIM and 3-part CSI specifications available to download
- The required amount of makeup air for the building is specified in the manual for easy planning
- Dedicated professional support team to help with selection and planning
