# Specifications

## Standard

- Open hearth means no glass!
- Single-sided (4' to 7' W and 36" or 48" H)
- Double-sided (4' to 6' widths x 30" H)
- Oak logs cast and hand-painted from actual logs
- 6" minimum TV clearance
- Engineered as a complete unit (no on-site assembly needed)
- Fail-safe system/automatic shut-off if necessary
- Non-combustible, field-installed interior panels up to 2" thick may be installed
- Combustible materials may be brought up to the edge of opening
- Venting can work around physical barriers in almost any situation
- Commercial-grade and UL-approved components
- Patent-pending non-mechanical damper automatically opens for operation and closes to mitigate cold air drafts when not in use

## Optional

- Reversible mirrored panels for a muted glow or dazzling reflections are available to enhance the flames

Custom sizing also available.

Field-installed interior brick may be wrapped around the vertical column and carried all the way up the face of the fireplace for a mason-built appearance.

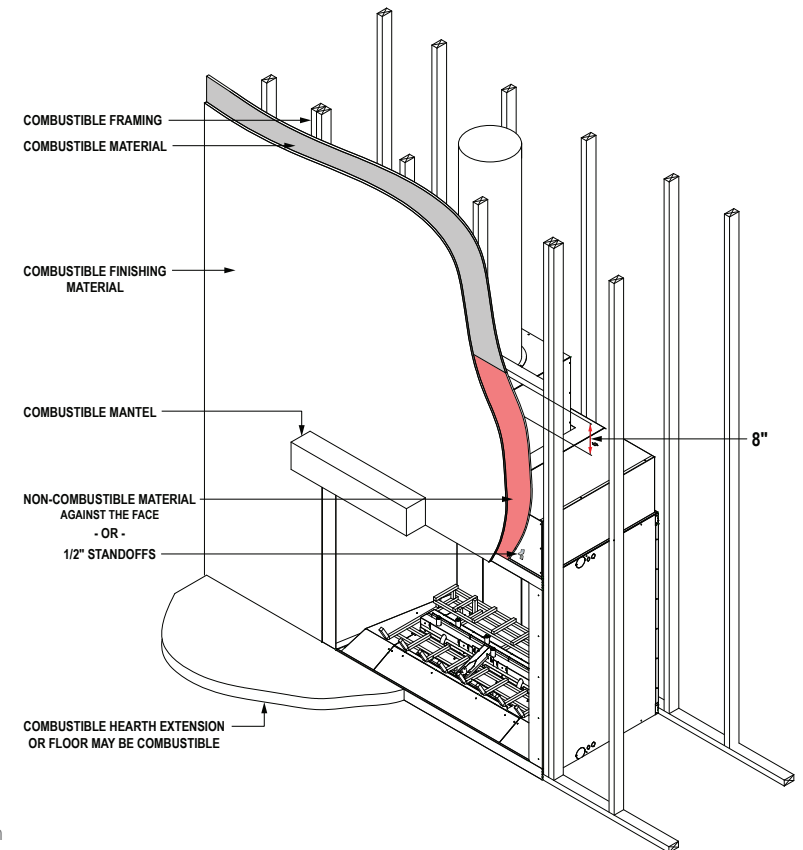

Remote control or connect to a smart home automation system for total convenience
