

# Can I mount a TV above my fireplace?

Yes! Many people mount their TV above the fireplace. The main objective is to redirect the heat away from the TV.

---

**A.** Minimum mantel/projection beyond face of TV, 2-1/2"

**B.** TV should be above mantel/projection, 2" min--3" max

**C.** Minimum of 18"

---

## Notes

1. These are good faith recommended clearances only and not a guarantee of compliance with all TV manufacturers' maximum allowable operating temperatures.
2. Since every home has unique air flow characteristics and maximum allowable operating temperatures can vary from manufacturer to manufacturer and from model to model, actual TV temperatures should be validated at the time of each installation. TVs should not be used in situations where the actual TV temperature exceeds the manufacturer's technical specifications. Contact the TV manufacturer directly if you cannot locate this information or have questions regarding this information.
3. Mantel height and depth must conform to the mantel requirements specified in the fireplace installation manual.
4. "C" dimension taken from the top of the hood or fireplace opening.
5. Suggestions on how to further reduce TV temperatures:
  - a. Increase "A" dimension.
  - b. Increase "C", however, increasing "B" beyond the maximum recommended typically results in higher temperatures.
