WOOD BURNING CATALYTIC & NON-CATALYTIC CAST IRON STOVES

CLASSIC WARMTH
ICONIC STYLE
Take a look at some of the unique benefits of catalytic and non-catalytic operation and see which is best for you.

CATALYTIC WOOD STOVES
Offering higher efficiency heating, catalytic wood stoves are ideal for those who wish to replace a major portion of their heating needs with their wood stove.

• Higher efficiency lowers fuel costs to heat your home.
• Longer, more even heat output.
• Advanced features such as top-loading convenience and automatic thermostatic air control.

NON-CATALYTIC WOOD STOVES
Non-catalytic wood stoves are affordable and require less maintenance. Easy to start and operate, a non-catalytic wood stove is ideal for those with lower heating demands.

• Lively, aesthetically pleasing flames.
• Easy to use and maintain.
COMPACT DESIGN
Perfect for home or cottage, the Aspen offers the warmth and delight of a wood burning fire in even the smallest of spaces. With a lower height, the smallest of the non-catalytic wood stoves from Vermont Castings offers the benefits of a larger stove — but in a smaller, more compact package.

RADIANT HEATING
Though small in stature, the Aspen is designed to deliver great heating results for its size. The I.R.-Coated Ceramic Glass provides warm, radiant heat while offering a beautiful view of the dancing, wood-fire flames.

FORM AND FUNCTION
The top plate cooking surface offers the look of classic style while also providing a convenient place to warm food items like soup.

FLEXIBLE INSTALLATION
With its compact size and the option of a transition door style, the Intrepid II from Vermont Castings will fit just about anywhere!

SAVE MONEY ON FUEL COSTS
This compact catalytic wood stove offers high efficiency — more heat from less wood — as well as a clean burn, making it great for the environment as well.

PEACE OF MIND WITH AUTOMATIC THERMOSTATIC CONTROL
Your stove won’t over-fire and you’ll enjoy longer, more even temperatures with automatic thermostatic air control. Enjoy the freedom to start your fire and go, worry-free.

LONGER BURN TIMES WITH TOP-LOADING CONVENIENCE
The top load design allows you to fill the stove to nearly 100% of its capacity. This leads to longer burn times and greater heat output, so you don’t have to load as often. Plus, it’s safer and virtually eliminates the escape of embers during loading.
A range of high quality accessories is available so you can add the perfect finishing touches to your Vermont Castings wood burning stove.

CHILD-GUARD SCREEN
Large enough to surround all Vermont Castings stoves, this portable safety screen allows you to have peace of mind that young children will not stay too near the stove.

CAST IRON WARMING SHELVES
Available in Classic Black and the full range of Vermont Castings enamel finishes, our cast iron warming shelves with mitten warmers are a great addition to your stove. Also great for keeping food items like a casserole warm, these shelves truly complete your look.

CAST IRON WOOD BOX
The perfect complement to our stoves, our wood box is handcrafted from cast iron, featuring the same attention to detail as our stoves. With fine cast lattice work and ample capacity, it’s the perfect way to store all the wood you need to keep your home warm.

THERMOMETER
This surface-mount magnetic thermometer is designed to work with all of our stoves. It allows you to make the correct air-intake settings and tell you when it is time to reload the stove or shut the damper.

GLOVES
Made from durable leather, these gloves are so popular at our foundry, we’ve now made them available to you. Perfect for loading the stove when it’s already fired up and burning.

OUTSIDE AIR ADAPTER
Allows your stove to draw air in from outside the house. Beneficial for newer, more heavily insulated homes and required in mobile home installations.

CAST IRON STOVE-TOP STEAMER
Available in all our colors, these beautifully cast ornate steamers are designed to return the comfort of a steamy kitchen to your home. Child-guard steamers are so popular at our foundry, we’ve now added them to our line. Our steamers are not designed for culinary use.

CAST IRON TRIVET
Deeping a traditional Vermont Castings foundry staple, this beautiful cast iron trivet is ideal as a cooking stand or to add visual interest to your stove installation. Cast in Vermont at our own foundry, this trivet features the same fine craftsmanship as our legendary stoves.

**APPROX. HEATING AREA**
- ASPEN | 800 sq. ft.
- INTREPID II | 1,200 sq. ft.

**BURN TIMES AND HEAT OUTPUTS**

**AVAILABLE COLORS**
- Classic Black, Bordeaux
- Classic Black, Biscuit, Majolica Brown, Bordeaux

**OUTSIDE AIR ADAPTOR**
- Yes

**ADDITIONAL FEATURES**
- Top plate cooking surface
- Polished cooking griddle

Burn times and heat outputs are based on laboratory testing using full loads of seasoned hardwoods, and may vary depending on how the stove is operated, type of wood and other factors. Average heating capacity is based on operation in building code-conforming homes under typical winter climate in New England, and also may vary.

Thermometer ratings are based on independent laboratory testing. See owner’s manual for complete installation and clearance requirements. All Vermont Castings stoves meet Washington State emissions standards.

*Flue collar in top exit position.
CONTINUING OUR ENDURING COMMITMENT TO BEING ECO-FRIENDLY

From the energy that powers our Vermont foundry and plant to the performance of our products, we keep you and the environment in mind. Our facilities operate entirely on clean and renewable energy sources and all our wood burning stoves are made from 100% recycled iron. Even after they leave the foundry, our stoves are designed to help homeowners stay green. In fact, no wood stove manufacturer can match Vermont Castings’ history of consistently exceeding the EPA’s standards for emissions.
