

ALLUSION EDGE LIGHTED BIRCH LOG SET SF-ALLE-BIRCH

Models: SF-ALLE50, SF-ALLE60, SF-ALLE78, SF-ALLE100

Installation Instructions

Introduction

The Allusion Edge Birch Log Set is hand-painted and offers a true-to-life look. These placement instructions provide guidance for the recommended setup.

The Allusion Edge Birch Log Set is designed to fit the Allusion Edge 50" (SF-ALLE50), 60" (SF-ALLE60), 78" (SF-ALLE78), and 100" (SF-ALLE100). Note that some pieces will not be used, and may be discarded, if setup with the 50", 60", or 78".

CAUTION! Risk of Cuts, Abrasions or Flying Debris.
Wear protective gloves and safety glasses during installation and service. Sheet metal edges are sharp.

Piece	50"	60"	78"	100"
A	1	1	1	2
B	1	2	1	2
C	1	1	2	2
D	1	1	2	2
E	1	1	1	2
F	2	2	2	4
G	1	1	2	2
H	2	3	3	4

Tools and Supplies Needed

Before beginning installation, be sure that the following tools/supplies are available.

- Gloves
- Safety Glasses
- Magnetic Phillips Screwdriver
- Black Glass Embers (included with appliance)
- Black Crystals (included with appliance)

Kit Components

Before beginning installation, confirm that all log pieces are included in the kit. See Figure 1 and table.

NOTE: Kit includes all piece quantities listed in the 100" column. Table also shows recommended quantities of each piece to use for each size appliance.

Lighted Birch Log and Media Placement

Refer to the Allusion Edge Owner's Manual for installation and appliance preparation instructions. Appliance installation should be completed before beginning log and media placement.

The lighted birch logs can be installed to the owner's preference, but always consider the following during placement and before closing up the appliance:

- Lighted logs were designed to be used with companion pieces that help conceal the wiring.
NOTE: *Reference Figures 2 - 5 for lighted log and companion piece recommendations.*
- The charred portion of the logs should be facing out of the appliance so that the glowing feature is visible when turned on.
- Black glass embers are the primary coverage media, with black crystals filling in gaps in the ember bed.

NOTE: *The recommended log placement is slightly different for each of the appliance sizes. Make sure to reference the correct figures based on your appliance.*

Follow the instructions below as the recommended setup for the lighted birch logs, charred companion pieces, black glass embers, and black crystals. Figures 2 - 5 show recommended birch log positioning for each appliance length.

1. Remove glass from the appliance, if needed. Refer to the Allusion Edge Owner's Manual for instructions.
CAUTION! Two adults recommended for the removal and installation of glass.
Use caution when handling glass. Failure to do so could result in personal injury or property damage.
2. Cover the ember bed with a thin layer of black glass embers (included with appliance), making sure not to cover the plug locations for the lighted birch logs.
3. Plug in and place each lighted birch log across the ember bed as shown in Figures 2 - 5. Position the logs with the charred portion facing outwards, so the glowing feature is visible when turned on.
4. Place companion pieces F and G as shown in Figures 2 - 5.
 - a. Move black glass embers as needed to allow the companion pieces to sit directly on the ember bed, so the ember bed lighting can glow through them.
 - b. Companion pieces are designed to conceal the wires and plugs, while also changing the elevation of the lighted birch logs.
 - c. Companion pieces E are not shown in Figures 2 - 5, and can be placed as desired, while also assisting with the concealment of wires and plugs, as needed.
5. After all logs and companion pieces are in place, use the remaining black glass embers and black crystal media to fill in any gaps.
6. Place bark pieces H to conceal any remaining exposed wire.
