

STONES - RED40-AU

- Installation Instructions -

Leave this manual with party responsible for use and operation.

WARNING! Choking Hazard! Keep media out of reach of children.

CAUTION! Risk of Burns! The fireplace should be turned off and cooled before media is installed.

CAUTION! Risk of Cuts, Abrasions or Flying Debris. Wear protective gloves and safety glasses during installation. Sheet metal edges are sharp.

Note: Optional Porcelain or Granite Kits used with lighted and non-lighted media units must be placed in unit before placing media in the unit.

1. Remove glass frame assembly from appliance. Reference installation manual fixed glass assembly for instructions on how to remove the glass.
2. The included stone placement jig MUST be used any time media is placed on the media tray to ensure that none end up in the burner lighting area. Verify that the stone placement jig is correctly installed in place in the appliance.
3. The stone placement jig must remain in place while media is placed on the base pan and around the pilot bracket.
4. No stones to be placed within 6 mm (1/4 in.) of the burner rails, as shown by shaded area in Figure 2.
5. Place an even layer of stones around the base pan as shown in Figure 4. Do not place media in the slot over the burner ports. See Figures 2 and 3. Figure 2 shows an outline of the burner tracks and the area in front of the pilot assembly, no media may be placed in shaded the area. Continue to place an even amount of media over the entire base pan. **DO NOT** install media in between the tracks over the entire length of the burner. This may cause lighting issues, undesirable burner flame, impingement, or delayed ignition.
6. Stones may be double stacked along outer edge of base pan as shown by Figure 4. Do not install stones double stacked along burner, this may cause lighting issues, undesirable burner flame, impingement or delayed ignition.

7. Remove the stone placement jig by removing the screw as noted in Figure 1.
8. Place the glass frame assembly back on the appliance. Assure that there is no media between the glass and the firebox. Media in this area will prevent the glass assembly from sealing.
9. Position the front tabs of the front access media tray toward the glass and then place in the groove of the glass frame. Line up the media tray so that the left and right cut-outs fit within the glass frame. See Figure 5. Fill tray or trays with media provided in kit.
10. Place media in the front tray. For an "Infinity" look, the media may be placed up against the glass and tray.
11. If impingement or undesirable flame appearance is observed, media may need to be adjusted to remove impingement.

⚠ WARNING

Delayed Ignition Risk

- Place stones according to instructions.
- Do NOT place stones in area in front of pilot or between burner tracks.
- Do NOT place stones in a position that they may fall into area in front of pilot.
- Do NOT use any media other than the stones supplied with this fireplace.

Fireplace will not function properly.
Delayed ignition may occur.

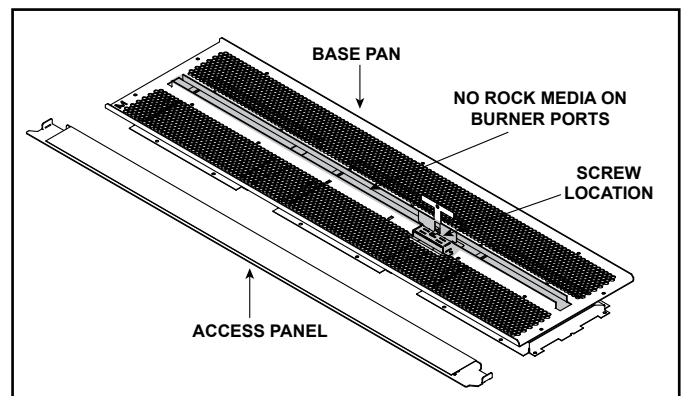

Figure 1. Location of Stone Placement Jig

WARNING! Risk of Fire. DO NOT place media directly in front of the pilot assembly or between the burner tracks over the burner ports.

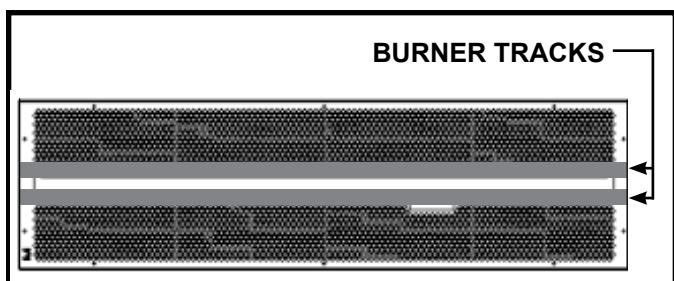

Figure 2. Place Media

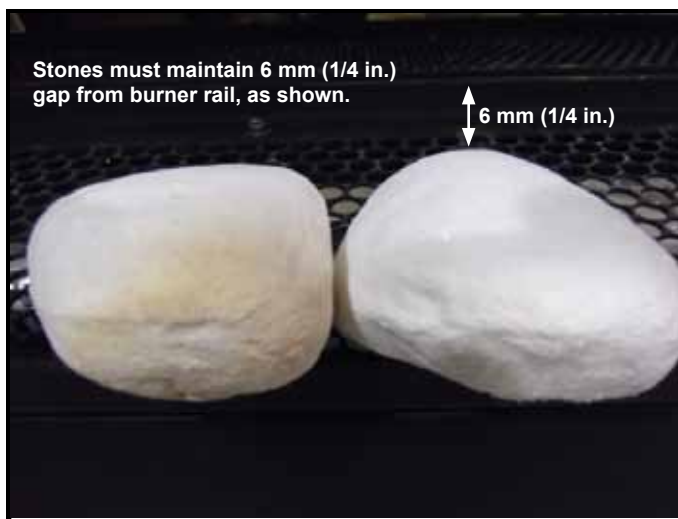

Figure 3. Placement of Media from Burner Rail

Note: Stones must maintain 6 mm (1/4 in.) gap from burner rail, as shown in Figure 3.

Figure 4. Media Placement

Note: Stones may be double stacked as shown in Figure 4 but, not closer to burner rail than stated earlier in instructions.

Figure 5. Front Access Media Tray

Figure 6. Location of Clear Tape

CAUTION! DO NOT remove clear tape located on bottom of media tray. Appliance will overheat and shut down.
