NOTICE: DO NOT discard this manual!

This appliance may be installed as an OEM installation in manufactured home (USA only) or mobile home and must be installed in accordance with the manufacturer’s instructions and the Manufactured Home Construction and Safety Standard, Title 24 CFR, Part 3280 in the United States, or the Standard for Installation in Mobile Homes, CAN/CSA Z240 MH Series, in Canada.

This appliance is only for use with the type(s) of gas indicated on the rating plate. This appliance is not convertible for use with other gases, unless a certified kit is used.

WARNING:
FIRE OR EXPLOSION HAZARD
Failure to follow safety warnings exactly could result in serious injury, death, or property damage.

• DO NOT store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.

• What to do if you smell gas
  - DO NOT try to light any appliance.
  - DO NOT touch any electrical switch. DO NOT use any phone in your building.
  - Leave the building immediately.
  - Immediately call your gas supplier from a neighbor’s phone. Follow the gas supplier’s instructions.
  - If you cannot reach your gas supplier, call the fire department.

• Installation and service must be performed by a qualified installer, service agency, or the gas supplier.

DANGER

HOT GLASS WILL CAUSE BURNS.

DO NOT TOUCH GLASS UNTIL COOLED.

NEVER ALLOW CHILDREN TO TOUCH GLASS.

A barrier designed to reduce the risk of burns from the hot viewing glass is provided with this appliance and shall be installed for the protection of children and other at-risk individuals.

In the Commonwealth of Massachusetts installation must be performed by a licensed plumber or gas fitter.

See appliance installation manual for additional Commonwealth of Massachusetts requirements.
Welcome

Read this manual before operating this appliance. Please retain this Owner’s Manual for future reference.

Read the Installation Manual before making any installation or finishing changes.

A. Congratulations

Congratulations on selecting a Heat & Glo gas fireplace, an elegant and clean alternative to wood burning fireplaces. The Heat & Glo gas fireplace you have selected is designed to provide the utmost in safety, reliability, and efficiency.

As the owner of a new fireplace, you’ll want to read and carefully follow all of the instructions contained in this Owner’s Manual. Pay special attention to all cautions and warnings.

This Owner’s Manual should be retained for future reference. We suggest that you keep it with your other important documents and product manuals.

The information contained in this Owner’s Manual, unless noted otherwise, applies to all models and gas control systems.

Your new Heat & Glo gas fireplace will give you years of durable use and trouble-free enjoyment. Welcome to the Heat & Glo family of fireplace products!

Homeowner Reference Information

We recommend that you record the following pertinent information about your fireplace.

Model Name: ___________________________ Date purchased/installed: ________________

Serial Number: _________________________ Location on fireplace: ____________________________

Dealership purchased from: ______________ Dealer Phone: ____________________________

Notes: __________________________________________________________________________________

Listing Label Information/Location

The model information regarding your specific fireplace can be found on the rating plate located on the left side of the appliance outer wrap.

Model: XXXXXXXX

Serial (Serie): XXXXXXXX

Type of Gas

Gas and Electric Information

Maximum Manifold Pressure (Pression) 0.00 in. w.c. (Po. Col. d’eau)

Minimum Manifold Pressure (Pression) 0.00 in. w.c. (Po. Col. d’eau)

Maximum Pressure (Pression) 0.00 in. w.c. (Po. Col. d’eau)

Approved Minimum (De Gaz) Acceptable 0.0 in. w.c. (Po. Col. d’eau)

Minimum Permissible Gas Supply for Purposes of Input Adjustment.

Total Electrical Requirements: 000Vac, 00Hz., less than 00 Amperes

Made in USA

Heat & Glo, a brand of Hearth & Home Technologies

7371 215th Street West, Lakeville, MN  55044

Not for use with solid fuel. (Ne doit pas entre utiliser avec un combustible solide).
Safety Alert Key:
• **DANGER!** Indicates a hazardous situation which, if not avoided will result in death or serious injury.
• **WARNING!** Indicates a hazardous situation which, if not avoided could result in death or serious injury.
• **CAUTION!** Indicates a hazardous situation which, if not avoided, could result in minor or moderate injury.
• **NOTICE:** Used to address practices not related to personal injury.

B. Limited Lifetime Warranty

Hearth & Home Technologies
LIMITED LIFETIME WARRANTY

Hearth & Home Technologies, on behalf of its hearth brands (“HHT”), extends the following warranty for HHT gas, wood, pellet, coal and electric hearth appliances that are purchased from an HHT authorized dealer.

**WARRANTY COVERAGE:**
HHT warrants to the original owner of the HHT appliance at the site of installation, and to any transferee taking ownership of the appliance at the site of installation within two years following the date of original purchase, that the HHT appliance will be free from defects in materials and workmanship at the time of manufacture. After installation, if covered components manufactured by HHT are found to be defective in materials or workmanship during the applicable warranty period, HHT will, at its option, repair or replace the covered components. HHT, at its own discretion, may fully discharge all of its obligations under such warranties by replacing the product itself or refunding the verified purchase price of the product itself. The maximum amount recoverable under this warranty is limited to the purchase price of the product. This warranty is subject to conditions, exclusions and limitations as described below.

**WARRANTY PERIOD:**
Warranty coverage begins on the date of original purchase. In the case of new home construction, warranty coverage begins on the date of first occupancy of the dwelling or six months after the sale of the product by an independent, authorized HHT dealer/distributor, whichever occurs earlier. The warranty shall commence no later than 24 months following the date of product shipment from HHT, regardless of the installation or occupancy date. The warranty period for parts and labor for covered components is produced in the following table.

The term “Limited Lifetime” in the table below is defined as: 20 years from the beginning date of warranty coverage for gas appliances, and 10 years from the beginning date of warranty coverage for wood, pellet, and coal appliances. These time periods reflect the minimum expected useful lives of the designated components under normal operating conditions.

</table>

See conditions, exclusions, and limitations on next page.
**WARRANTY CONDITIONS:**

- This warranty only covers HHT appliances that are purchased through an HHT authorized dealer or distributor. A list of HHT authorized dealers is available on the HHT branded websites.
- This warranty is only valid while the HHT appliance remains at the site of original installation.
- This warranty is only valid in the country in which the HHT authorized dealer or distributor that sold the appliance resides.
- Contact your installing dealer for warranty service. If the installing dealer is unable to provide necessary parts, contact the nearest HHT authorized dealer or supplier. Additional service fees may apply if you are seeking warranty service from a dealer other than the dealer from whom you originally purchased the product.
- Check with your dealer in advance for any costs to you when arranging a warranty call. Travel and shipping charges for parts are not covered by this warranty.

**WARRANTY EXCLUSIONS:**

This warranty does not cover the following:

- Changes in surface finishes as a result of normal use. As a heating appliance, some changes in color of interior and exterior surface finishes may occur. This is not a flaw and is not covered under warranty.
- Damage to printed, plated, or enameled surfaces caused by fingerprints, accidents, misuse, scratches, melted items, or other external sources and residues left on the plated surfaces from the use of abrasive cleaners or polishes.
- Repair or replacement of parts that are subject to normal wear and tear during the warranty period. These parts include: paint, wood, pellet and coal gaskets, firebricks, grates, flame guides, batteries and the discoloration of glass.
- Expansion, contraction, or movement of certain parts causing noise. These conditions are normal and complaints related to this noise are not covered by this warranty.
- Damages resulting from: (1) failure to install, operate, or maintain the appliance in accordance with the installation instructions, operating instructions, and listing agent identification label furnished with the appliance; (2) failure to install the appliance in accordance with local building codes; (3) shipping or improper handling; (4) improper operation, abuse, misuse, continued operation with damaged, corroded or failed components, accident, or improperly/incorrectly performed repairs; (5) environmental conditions, inadequate ventilation, negative pressure, or drafting caused by tightly sealed constructions, insufficient make-up air supply, or handling devices such as exhaust fans or forced air furnaces or other such causes; (6) use of fuels other than those specified in the operating instructions; (7) installation or use of components not supplied with the appliance or any other components not expressly authorized and approved by HHT; (8) modification of the appliance not expressly authorized and approved by HHT in writing; and/or (9) interruptions or fluctuations of electrical power supply to the appliance.
- Non-HHT venting components, hearth components or other accessories used in conjunction with the appliance.
- Any part of a pre-existing fireplace system in which an insert or a decorative gas appliance is installed.
- HHT’s obligation under this warranty does not extend to the appliance’s capability to heat the desired space. Information is provided to assist the consumer and the dealer in selecting the proper appliance for the application. Consideration must be given to appliance location and configuration, environmental conditions, insulation and air tightness of the structure.

This warranty is void if:

- The appliance has been over-fired or operated in atmospheres contaminated by chlorine, fluorine, or other damaging chemicals. Over-firing can be identified by, but not limited to, warped plates or tubes, rust colored cast iron, bubbling, cracking and discoloration of steel or enamel finishes.
- The appliance is subjected to prolonged periods of dampness or condensation.
- There is any damage to the appliance or other components due to water or weather damage which is the result of, but not limited to, improper chimney or venting installation.

**LIMITATIONS OF LIABILITY:**

- The owner’s exclusive remedy and HHT’s sole obligation under this warranty, under any other warranty, express or implied, or in contract, tort or otherwise, shall be limited to replacement, repair, or refund, as specified above. In no event will HHT be liable for any incidental or consequential damages caused by defects in the appliance. Some states do not allow exclusions or limitation of incidental or consequential damages, so these limitations may not apply to you. This warranty gives you specific rights; you may also have other rights, which vary from state to state. EXCEPT TO THE EXTENT PROVIDED BY LAW, HHT MAKES NO EXPRESS WARRANTIES OTHER THAN THE WARRANTY SPECIFIED HEREIN. THE DURATION OF ANY IMPLIED WARRANTY IS LIMITED TO DURATION OF THE EXPRESSED WARRANTY SPECIFIED ABOVE.
A. Appliance Certification

**MODELS:** COSMO-I30-IFT, COSMO-I35-IFT  
**LABORATORY:** Underwriters Laboratories, Inc. (UL)  
**TYPE:** Direct Vent Heater  
**STANDARD:** ANSI Z21.88-2017 CSA 2.33-2017

This product is listed to ANSI standards for “Vented Gas Fireplace Heaters” and applicable sections of “Gas Burning Heating Appliances for Manufactured Homes and Recreational Vehicles”, and “Gas Fired Appliances for Use at High Altitudes”.

Heat & Glo gas inserts are designed for installations into solid fuel masonry or factory built fireplaces that have been installed in accordance with the National, Provincial, State and local building codes. Fireplaces are to be constructed of non-combustible materials and, in the absence of local or regional codes, meet criteria of NFPA 211. No additional outside air source is required.

**NOTICE:** This installation must conform with local codes. In the absence of local codes you must comply with the National Fuel Gas Code, ANSI Z223.1-latest edition in the U.S.A. and the CAN/CGA B149 Installation Codes in Canada.

**NOT INTENDED FOR USE AS A PRIMARY HEAT SOURCE.**  
This appliance is tested and approved as either supplemental room heat or as a decorative appliance. It should not be factored as primary heat in residential heating calculations.

B. Glass Specifications

This appliance is equipped with 5 mm ceramic glass. Replace glass only with 5 mm ceramic glass. Please contact your dealer for replacement glass.

Installation and service of this appliance should be performed by qualified personnel. Hearth & Home Technologies recommends HHT Factory Trained or NFI certified professionals.
### 3 Important Safety and Operating Information

#### A. Appliance Safety

**WARNING! DO NOT operate fireplace before reading and understanding operating instructions.** Failure to operate fireplace according to operating instructions could cause fire or injury.

**DANGER**

**HOT GLASS WILL CAUSE BURNS.**

**DO NOT TOUCH GLASS UNTIL COOLED.**

**NEVER ALLOW CHILDREN TO TOUCH GLASS.**

- Keep children away.
- CAREFULLY SUPERVISE children in same room as fireplace.
- Alert children and adults to hazards of high temperatures.

**High temperatures may ignite clothing or other flammable materials.**
- Clothing, furniture, draperies, and other flammable materials must not be placed on or near the appliance.

*A barrier designed to reduce the risk of burns from the hot viewing glass is provided with this appliance and shall be installed for the protection of children and other at-risk individuals. DO NOT operate the appliance with the barrier removed. If the barrier becomes damaged, the barrier shall be replaced with the manufacturer’s barrier for this appliance.*

Contact your dealer or Hearth & Home Technologies if the barrier is not present or help is needed to properly install one.

**WARNING! Choking Hazard!** Keep media out of reach of children.

Young children should be carefully supervised when they are in the same room as the appliance. Toddlers, young children and others may be susceptible to accidental contact burns.

- A physical barrier is recommended if there are at risk individuals in the house.
- To restrict access to a fireplace or stove, install an adjustable safety gate to keep toddlers, young children and other at risk individuals out of the room and away from hot surfaces.
- Install a switch lock or a wall/remote control with child protection lockout feature.

- Keep remote controls out of reach of children.
- Never leave children alone near a hot fireplace, whether operating or cooling down.
- Teach children to NEVER touch the fireplace.
- Consider not using the fireplace when children will be present.

Contact your dealer for more information, or visit: [www.hpb.org/Product-Info/Fireplace-Stove-Heater/Glass-Fronts-Safety](http://www.hpb.org/Product-Info/Fireplace-Stove-Heater/Glass-Fronts-Safety).

To prevent unintended operation when not using your fireplace for an extended period of time (summer months, vacations, trips, etc):

- Remove batteries from remote controls.
- Turn off wall controls.
- Set the selector switch on the control module to the off position and remove batteries.

**WARNING:** This product and the fuels used to operate this product (liquid propane or natural gas), and the products of combustion of such fuels, can expose you to chemicals including benzene, which is known to the State of California to cause cancer and reproductive harm. For more information go to: [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

#### Clear Space

**WARNING! DO NOT place combustible objects in front of the fireplace or block louvers. High temperatures may start a fire.** See Figure 3.1.

Avoid placing candles and other heat-sensitive objects on mantel or hearth. Heat may damage these objects.

![Figure 3.1 Clear Space Requirement - All Models](image-url)
B. General Operating Parts

Figure 3.2 references the general operating parts of the appliance and the section of this manual in which they are discussed.

C. Fuel Specifications

**WARNING! Risk of Fire or Explosion!** Appliance must be set up for compatible gas type!

- This appliance is designed to operate on either natural gas or propane. Make sure the appliance is compatible with gas type selected for installation site.
- Conversions must be made by a qualified service technician using Hearth & Home Technologies specified and approved parts.

**NOTICE:** Temperatures listed above are taken with a temperature measuring probe as prescribed by the test standard used for appliance certification. Temperatures on walls or mantels taken with an infrared thermometer may yield increased temperatures of up to 30 degrees or more depending on the thermometer settings and material characteristics being measured. Use appropriate finishing materials that are able to withstand these conditions. For additional finishing guidelines, see Section 8 Installation Manual.

D. Wall Surface/TV Guidelines

**Figure 3.3** Good Faith Wall Surface Temperatures Above Appliance
Good Faith Guidelines for TV Installations above a Typical Gas Fireplace

<table>
<thead>
<tr>
<th>Item</th>
<th>Minimum Dimensions</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>2.5 inches</td>
</tr>
<tr>
<td>B</td>
<td>2 inches minimum to 3 inches maximum</td>
</tr>
<tr>
<td>C</td>
<td>24 inches</td>
</tr>
<tr>
<td>D</td>
<td>Wall Brkt + TV Thickness + 2.5 inches</td>
</tr>
</tbody>
</table>

Notes:
1. These are good faith recommended clearances only and not a guarantee of compliance with all TV manufacturers' maximum allowable operating temperatures.
2. Since every home has unique air flow characteristics and maximum allowable operating temperatures can vary from manufacturer to manufacturer and from model to model, actual TV temperatures should be validated at the time of each installation. TVs should not be used in situations where the actual TV temperature exceeds the manufacturers' maximum allowable operating temperatures identified in the TV's technical specifications. Contact the TV's manufacturer directly if you cannot locate this information or have questions regarding the information.
3. Mantel height and depth must conform to mantle requirements specified in the fireplace installation manual.
4. “C” dimension taken from the top of the hood or fireplace opening.
5. Suggestions on how to further reduce TV temperatures:
   a. Increase “A” dimension.
   b. Increase “C” dimension, however, increasing “B” dimension beyond maximum recommended typically results in higher temperatures.

Figure 3.4 Good Faith TV Guidelines
E. Before Lighting Appliance

Before operating this fireplace for the first time, **have a qualified service technician**:

- Verify all shipping materials have been removed from inside and/or underneath the firebox.
- Review proper placement of logs, glass media and stones.
- Check the wiring.
- Check the air shutter adjustment.
- Ensure that there are no gas leaks.
- Verify Glass Seal Plate is properly installed. See Figure 3.6.

**WARNING!** Glass seal plate must be properly installed. Risk of elevated component temps and carbon monoxide exposure.

- Ensure that the glass is sealed and in the proper position and that the integral barrier is in place.

**WARNING! Risk of Fire or Asphyxiation! DO NOT operate fireplace with fixed glass assembly removed.**

- Verify collar slide plate screw is attached see Figure 3.5.

![Figure 3.5 Collar Slide Plate Screw Detail](image)
F. Lighting Instructions (IPI)

FOR YOUR SAFETY READ BEFORE LIGHTING

WARNING: If you do not follow these instructions exactly, a fire or explosion may result causing property damage, personal injury or loss of life.

A. This appliance is equipped with an intermittent pilot ignition (IPI) device which automatically lights the burner. DO NOT try to light the burner by hand.

B. BEFORE LIGHTING, smell all around the appliance area for gas. Be sure to smell next to the floor because some gas is heavier than air and will settle on the floor.

WHAT TO DO IF YOU SMELL GAS

• DO NOT try to light any appliance.
• DO NOT touch any electric switch; do not use any phone in your building.

WARNING

NOT FOR USE WITH SOLID FUEL

GAS VALVE

LIGHTING INSTRUCTIONS (IPI)

1. This appliance is equipped with an ignition device which automatically lights the burner. DO NOT try to light the burner by hand.

1. Equipped with wall switch: Turn ON/OFF switch to ON.
2. Equipped with remote or wall control: Press ON button.
3. Equipped with thermostat: Set temperature to desired setting.

2. Wait five (5) minutes to clear out any gas. Then smell for gas, including near the floor. If you smell gas, STOP! Follow “B” in the Safety Information located on the top of this label. If you do not smell gas, go to next step.

3. To light the burner:
   Equipped with wall switch: Turn ON/OFF switch to ON.
   Equipped with remote or wall control: Press ON button.
   Equipped with thermostat: Set temperature to desired setting.

4. If the appliance does not light after three tries, call your service technician or gas supplier.

D. DO NOT use this appliance if any part has been under water. Immediately call a qualified service technician to inspect the appliance and to replace any part of the control system and any gas control which has been under water.

TO TURN OFF GAS TO APPLIANCE

1. Equipped with wall switch: Turn ON/OFF switch to OFF.
2. Service technician should turn off electric power to the control when performing service.

DANGER

HOT GLASS WILL CAUSE BURNS.
DO NOT TOUCH GLASS UNTIL COOLED.
NEVER ALLOW CHILDREN TO TOUCH GLASS.

A barrier designed to reduce the risk of burns from the hot viewing glass is provided with this appliance and shall be installed for the protection of children and other at-risk individuals.

WARNING:

DO NOT CONNECT LINE VOLTAGE (110/120 VAC OR 220/240 VAC) TO THE CONTROL VALVE.

Improper installation, adjustment, alteration, service or maintenance can cause injury or property damage. Refer to the owner’s information manual provided with this appliance. For assistance or additional information, consult a qualified installer, service agency or the gas supplier.

This appliance needs fresh air for safe operation and must be installed so there are provisions for adequate combustion and ventilation air.

Keep burner and control compartment clean. See installation and operating instructions accompanying appliance.

CAUTION:

Hot while in operation. DO NOT touch. Keep children, clothing, furniture, gasoline and other liquids having flammable vapors away.

DO NOT operate the appliance with fixed glass assembly removed, cracked or broken. Replacement of the fixed glass assembly should be done by a licensed or qualified service person.

NOT FOR USE WITH SOLID FUEL

For use with natural gas and propane. A conversion kit, as supplied by the manufacturer, shall be used to convert this appliance to the alternate fuel.

Also Certified for Installation in a Bedroom or a Bed Sitting Room.

This appliance must be installed in accordance with local codes. If any; if none, follow the National Fuel Gas Code, ANSI Z223.1/ NFPA 54, or the National Gas and Propane Installation code, CSA B149.1.

For additional information on operating your Hearth & Home Technologies fireplace, please refer to www.hearthnhome.com.
G. Appliance Break-In

Initial Break-in Procedure

• The fireplace should be run three to four hours continuously on high flame.
  This cures the materials used to manufacture the fireplace.
• Turn the fireplace off and allow it to completely cool.
• Remove decorative front and fixed glass assembly. See Section 4.B.
• Clean fixed glass assembly. See Section 4.B.
• Verify Glass Seal Plate is properly installed. See Figure 3.6.

WARNING! Glass seal plate must be properly installed. Risk of elevated component temps and carbon monoxide exposure.

• Replace the fixed glass assembly and run continuously on high an additional 12 hours.

Note: Some IPI systems have a safety feature that automatically shuts down the fireplace after 9 hours of continuous operation without receiving a command from the remote control. If this occurs, restart the appliance.
• Verify collar slide plate screw is attached see Figure 3.5.

NOTICE! Open windows for air circulation during fireplace break-in.
• Some people may be sensitive to smoke and odors.
• Smoke detectors may activate.

Figure 3.6 Glass Seal Plate

H. Heat Management

Heat Output

Heat output may be controlled on the COSMO-IFT model by adjusting the “FLAME” setting and “FAN” setting on the RC-400 remote control.

NOTICE! Set the fan speed to high on the RC400 remote control during the first three to four hours of break-in operation. See Section G. This break-in will ensure optimum speed control of the fan during subsequent use.
I. Operation During A Power Outage - IntelliFire™ Touch

The IntelliFire™ Touch intermittent pilot ignition system comes with a battery backup system that enables the flame to operate in a power outage. See appliance manual bag for battery pack. Batteries should not be placed in the battery pack while using electrical power to operate the fireplace. Remove batteries from battery pack when power has been restored and remove battery pack from the appliance.

**NOTICE:** Batteries should only be used as a power source in the event of an emergency power outage. Batteries should not be used as a primary long-term power source. Batteries tend to corrode over time.

➢ **NOTE:** Battery pack may have been previously installed during installation of appliance as shown in Figure 3.8.

2. Toggle surround manual reset switch position to “OFF”. See Figure 3.9. Check to make sure the ignition module switch is **NOT** in the “ON” position.

3. Locate the battery pack and insert four AA cell batteries. The battery pack is shipped in the appliance manual bag. Battery polarity must be correct or module damage will occur. Connect to black and red wires labelled “BATT”. A complete wiring diagram is included in the Electrical section of the appliance Installation Manual.

4. Before operating appliance install decorative front. If removed, install glass seal plate and fixed glass assembly.

**WARNING!** Glass seal plate must be properly installed.
Risk of elevated component temps and carbon monoxide exposure.

5. Turn the appliance on according to the instructions below for the appropriate type of control:

**Wireless Remote:**
- Remote receiver is attached to the ignition module.
- Toggle surround manual reset switch position to “ON”. See Figure 3.9. Check to make sure ignition module switch is in the “REMOTE” position.
- Use the remote to turn the appliance on.
- To preserve battery life, do not use the HI/LO flame or THERMOSTAT options.

**Ignition Module:**
- Toggle surround manual reset switch position to “ON”. See Figure 3.9.
- Locate the ignition module in the control cavity.
- Slide the ON/REMOTE/OFF switch to the ON position. See Figure 3.9.

**NOTICE:** Some functionality will be lost when using battery backup including fan, lights, or any other auxiliary functions that require household 110-120 VAC power.

To Operate Fireplace Using Battery Power (DC):
1. Access the control cavity of the appliance. See Figure 3.7 for location. The decorative front will need to be removed.

2. Toggle surround manual reset switch position to “OFF”. See Figure 3.9. Check to make sure the ignition module switch is **NOT** in the “ON” position.

3. Locate the battery pack and insert four AA cell batteries. The battery pack is shipped in the appliance manual bag. Battery polarity must be correct or module damage will occur. Connect to black and red wires labelled “BATT”. A complete wiring diagram is included in the Electrical section of the appliance Installation Manual.

4. Before operating appliance install decorative front. If removed, install glass seal plate and fixed glass assembly.

**WARNING!** Glass seal plate must be properly installed.
Risk of elevated component temps and carbon monoxide exposure.

To Return to Operation Using Electrical (AC) Power
- Toggle surround manual reset switch position to “OFF”. See Figure 3.9.
- Remove decorative front.
- Disconnect the battery pack, remove the batteries and store the battery pack for future use.
- Slide the ON/REMOTE/OFF switch to the REMOTE position.
- Replace decorative front. If removed, replace glass seal plate and fixed glass assembly.

**WARNING!** Glass seal plate must be properly installed.
Risk of elevated component temps and carbon monoxide exposure.
- Resume normal operation with the RC400.
J. Detailed Component Operating Instructions - IntelliFire™ Touch

IFT-ECM Detailed Operating Instruction

This model is shipped from the factory equipped with the IFT-RC400 remote.

SEE SECTION 4 FOR COMPONENT ACCESS DETAILS.

1. The Electronic Control Module (IFT-ECM) has a three-position ON/OFF/REMOTE selector switch that must be set for proper operation. See Figure 3.8. When changing switch positions, it is important to pause in each position for 1-2 seconds.

OFF Position:
The appliance will not respond to any commands from a wired wall switch, IFT-RC150 or IFT-RC400 remote controls. The unit should be in the OFF position during installation, service, backup battery installation, fuel conversion and to reset the IFT-ECM in the event the system goes into a LOCK-OUT mode as the result of a system error. When switched to the OFF position while the appliance is operating, the system will shut down.

ON Position:
The appliance will ignite and run continuously at the HI flame setting. No adjustment in flame height is possible.

Remote Position:
The remote position allows operation of the appliance from a wired wall switch, IFT-RC400 or IFT-RC150 remote controls. The IFT-ECM switch must be in this position to pair the IFT-ECM with the IFT-ACM (if installed), and/or IFT-RC400 and IFT-RC150 remote controls. See the IFT-RC400 or IFT-RC150 installation manual for detailed instructions on pairing the IFT-ECM with the remote controls. After successfully pairing a IFT-RC400, all installed accessories can be controlled by the IFT-RC400 (see IFT-RC400 user manual). The RC150 allows the user to turn ON/OFF the flame in the appliance and activate the Cold Climate mode if desired. The IFT-ECM has a safety feature that will automatically shut down the fireplace after 9 hours of continuous operation in the ON position.

The IFT-ECM has a safety feature that will automatically shut down the fireplace after 9 hours of continuous operation in the ON position.

3. The Pilot button on the IFT-ECM activates the Cold Climate function of the fireplace. This function lights the pilot flame ONLY to provide enough heat in the firebox to reduce condensation in cool, high humidity ambient conditions. To activate the Cold Climate press and hold the Pilot button for one second and release. The IFT-ECM will flash two green LED blinks, beep twice and light and rectify the pilot flame. To turn off Cold Climate, press and hold the Pilot button for one second and release. The IFT-ECM will flash one green LED blink, beep once and shut down the pilot flame. If remote controls are paired with the IFT-ECM, this feature can also be activated with the IFT-RC400 and/or IFT-RC150.

4. An IFT-ECM reset is required if the module is in a lock-out condition. When this occurs, the appliance is shut down and the IFT-ECM status indicator LED will be blinking a RED/GREEN error code along with a one-time audible double-beep. If the IFT-ECM is in a lock-out condition, refer to the troubleshooting chart to interpret the error code and take corrective action as required. To reset the IFT-ECM after a lock-out error:

Figure 3.9 IFT-ECM
CAUTION! Risk of burns! Appliance surfaces are hot when operating and during cool down. Use care and wear gloves when opening the front and accessing components inside the appliance.

- Toggle the appliance reset switch to the off position. See Figure 3.10 for reset switch location.

  or

- Set the IFT-ECM 3-position selector switch to OFF position.
  - Wait five (5) minutes to allow possible accumulated gas to clear.
  - Toggle the appliance reset switch to the on position.

  or

- Set the IFT-ECM 3-position selector switch to ON or REMOTE position. Module will beep once and flash a three GREEN LED code on successful startup.

If placed in ON position, the appliance will ignite normally if the error condition was corrected.

If placed in IFT-REM position or reset switch used, use the paired IFT-RC400, IFT-RC150 or wired wall switch to start the appliance; appliance will ignite normally if the error condition was corrected.

If the IFT-ECM re-enters the lock-out condition after these steps, call your dealer for service.

Appliance ON/OFF:
A wall control, thermostat or remote control may be used to control the ON/OFF function of the appliance. Follow instructions included with the installed control. Contact your dealer for details.

Fan Kit
- This appliance includes a factory installed fan.
- Fan functions are integrated into the included IFT-RC400 remote control.

Fan Kit
- This appliance includes a factory installed fan.
- Fan functions are integrated into the included IFT-RC400 remote control.
Any safety screen or guard removed for servicing must be replaced prior to operating the fireplace.

When properly maintained, your fireplace will give you many years of trouble-free service. Contact your dealer to answer questions regarding proper operation, troubleshooting and service for your appliance. Visit www.heatnglo.com to locate a dealer. We recommend annual service by a qualified service technician.

B. Maintenance Tasks - Homeowner

Installation and repair should be done by a qualified service technician only. The appliance should be inspected before use and at least annually by a professional service person.

The following tasks may be performed annually by the homeowner. If you are uncomfortable performing any of the listed tasks, please call your dealer for a service appointment.

More frequent cleaning may be required due to excessive lint from carpeting, bedding material, etcetera. It is imperative that control compartments, burners and circulating air passageways of the appliance be kept clean. Any safety screen, guard, or barrier removed for servicing the appliance must be replaced prior to operating the appliance.

CAUTION! Risk of Burns! The fireplace should be turned off and cooled before servicing.

Decorative Front

Frequency: Annually
By: Homeowner

Tools needed: Protective gloves, stable work surface
- Assess condition of screen and replace as necessary.
- Inspect for scratches, dents or other damage and repair as necessary.

Glass Cleaning

Frequency: Seasonally
By: Homeowner

Tools Needed: Protective gloves, glass cleaner, drop cloth, multi-purpose tool, and a stable work surface.

CAUTION! Handle fixed glass assembly with care. Glass is breakable.
- Avoid striking, scratching or slamming glass
- Avoid abrasive cleaners
- DO NOT clean glass while it is hot
- Prepare a work area large enough to accommodate fixed glass assembly and door frame by placing a drop cloth on a flat, stable surface.

Note: Fixed glass assembly and gasketing may have residue that can stain carpeting or floor surfaces.
- Remove door or decorative front from fireplace and set aside on work surface.
Removing Fixed Glass Assembly

**WARNING! Risk of Asphyxiation!** Handle fixed glass assembly with care. Inspect the gasket to ensure it is undamaged and inspect the glass for cracks, chips or scratches.

- **DO NOT** strike, slam, or scratch glass.
- **DO NOT** operate fireplace with glass removed, cracked, broken or scratched.
- Replace as a complete assembly.

The glass assembly fastens to the fireplace in four places. The four fastening mechanisms are spring-loaded glass latches. An example of the glass latch is shown in Figure 4.2.

To release glass assembly, use the supplied multi-purpose tool. See Figure 4.1. While supporting the glass assembly, pull the two bottom spring-loaded latches forward and allow them to retract away from the glass assembly. Tilt the bottom of the glass assembly outward until the top latches disengage.

- Clean glass with a non-abrasive commercially available cleaner.
  - Light deposits: Use a soft cloth with soap and water.
  - Heavy deposits: Use commercial fireplace glass cleaner (consult with your dealer).

Replacing Fixed Glass Assembly

- Verify Glass Seal Plate is properly installed. See Figure 4.3.

**WARNING!** Glass seal plate must be properly installed. Risk of elevated component temps and carbon monoxide exposure.

- Tilt the top of the glass assembly toward fireplace and slide glass assembly upward to engage top latches. Verify top latches are fully engaged and then fasten the two bottom latches using the supplied multi-purpose tool.

- Reinstall door or decorative front.
Control Cavity Access

Tools needed: Protective gloves, multi-purpose tool.
- Remove decorative front.
- Remove fixed glass assembly.
- Remove glass seal plate. See Figure 4.3.
- For easier access, glass clip assemblies can be removed. See Figure 4.5. Be careful when handling base refractory.
- For access, slide out component tray. See Figure 4.4.

Note: Wires may need to be removed from clips for full access. See Figure 4.4.

CAUTION: Be sure to reinstall the component heat shield before firing the appliance. Components will overheat.
C. Maintenance Tasks - Qualified Service Technician

The following tasks must be performed by a qualified service technician.

Gasket Seal and Glass Assembly Inspection

Frequency: Annually
By: Qualified Service Technician
Tools needed: Protective gloves, drop cloth, multi-purpose tool, and a stable work surface.
• Inspect gasket seal and its condition.
• Inspect fixed glass assembly for scratches and nicks that can lead to breakage when exposed to heat.
• Confirm there is no damage to glass or glass frame. Replace as necessary.
• Verify that fixed glass assembly is properly retained and attachment components are intact and not damaged. Replace as necessary.
• Verify Glass Seal Plate is properly installed. See Figure 4.3.

WARNING! Glass seal plate must be properly installed. Risk of elevated component temps and carbon monoxide exposure.

Logs (Optional)

Frequency: Annually
By: Qualified Service Technician
Tools needed: Protective gloves.
• Inspect for damaged or missing logs. Replace as necessary. Refer to Installation manual for log placement instructions.
• Verify correct log placement and no flame impingement causing sooting. Correct as necessary.

Control Compartment and Firebox Top

Frequency: Annually
By: Qualified Service Technician
Tools needed: Protective gloves, vacuum cleaner, dust cloths
• Vacuum and wipe out dust, cobwebs, debris or pet hair. Use caution when cleaning these areas. Screw tips that have penetrated the sheet metal are sharp and should be avoided.
• Verify that the collar slide plate screw is installed. See Figure 3.5.
• Remove all foreign objects.
• Verify unobstructed air circulation.
• Ensure no wire connections become disengaged.

Remote Control

Frequency: Seasonally
By: Homeowner
Tools needed: Replacement batteries and remote control instructions.
• Locate remote control transmitter and receiver.
• Verify operation of remote. Refer to remote control operation instructions for proper calibration and setup procedure.
• Replace batteries as needed in remote transmitters.
• Place remote control out of reach of children.
If not using your fireplace for an extended period of time (summer months, vacations/trips, etc), to prevent unintended operation:
• Remove batteries from remote controls.
• Turn the ON/OFF/REMOTE switch on the control module to OFF.

Venting

Frequency: Seasonally
By: Homeowner
Tools needed: Protective gloves and safety glasses.
• Inspect venting and termination cap for blockage or obstruction such as plants, bird nests, leaves, snow, debris, etc.
• Verify termination cap clearance to subsequent construction (building additions, decks, fences, or sheds).
• Verify collar slide plate screw is attached see Figure 3.5.
• Inspect for corrosion or separation.
• Verify weather stripping, sealing and flashing remains intact.
• Inspect draft shield to verify it is not damaged or missing.
Burner Ignition and Operation

Frequency: Annually

By: Qualified Service Technician

Tools needed: Protective gloves, vacuum cleaner, whisk broom, flashlight, voltmeter, indexed drill bit set, and a manometer.

- Verify burner is properly secured and aligned with pilot or igniter.
- Clean off burner top, inspect for plugged ports, corrosion or deterioration. Replace burner if necessary.
- Verify batteries have been removed from battery back-up IPI systems to prevent premature battery failure or leaking.
- Check for smooth lighting and ignition carryover to all ports. Verify that there is no ignition delay. Inspect and ensure the lighting of the main burner occurs within four seconds of the main gas valve opening.
- Inspect for lifting or other flame problems.
- Verify air shutter setting is correct. See Installation Manual for required air shutter setting. Verify air shutter is clear of dust and debris.
- Verify vertical restrictor setting is correct. See Installation Manual for required vertical restrictor setting.
- Inspect orifice for soot, dirt and corrosion. Verify orifice size is correct. See Service Parts List for proper orifice sizing.
- Verify manifold and inlet pressures. Adjust regulator as required.
- Check all accessible gas-carrying tubes, connections, pipes and other components for leaks.
- Inspect pilot flame pattern and strength. See Figure 4.6 for proper pilot flame pattern. Clean or replace orifice spud as necessary.
- Inspect IPI flame sensing rod for soot, corrosion and deterioration. Polish with fine steel wool or replace as required.
- Verify that there is not a short in flame sense circuit by checking continuity between pilot hood and flame sensing rod. Replace pilot as necessary.

Figure 4.6 IPI Pilot Flame Patterns

Media Placement

CAUTION: Do not install media behind rear media edge. This may cause sooting. See Section 9.F of Installation Manual.

<table>
<thead>
<tr>
<th>Models</th>
<th>Media Quantity (Bag)</th>
</tr>
</thead>
<tbody>
<tr>
<td>COSMO-I30-IFT (NG)</td>
<td>1-1/4</td>
</tr>
<tr>
<td>COSMO-I30-IFT (Propane)</td>
<td>less than 1-1/4</td>
</tr>
<tr>
<td>COSMO-I35-IFT (NG)</td>
<td>1-1/2</td>
</tr>
<tr>
<td>COSMO-I35-IFT (Propane)</td>
<td>less than 1-1/2</td>
</tr>
</tbody>
</table>

CAUTION: Place only one thin layer of media over the burner and base pan when using Propane gas. Excess media on burner and base pan may cause sooting. One thin layer of media may require less media than indicated in the above media chart.
### Frequently Asked Questions and Troubleshooting

#### A. Frequently Asked Questions

<table>
<thead>
<tr>
<th>ISSUE</th>
<th>SOLUTIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Condensation on the glass</td>
<td>This is a result of gas combustion and temperature variations. As the appliance warms, this condensation will disappear.</td>
</tr>
<tr>
<td>Blue flames</td>
<td>This is a result of normal operation and the flames will begin to yellow as the appliance is allowed to burn for 20 to 40 minutes.</td>
</tr>
<tr>
<td>Odor from appliance</td>
<td>When first operated, this appliance may release an odor for the first several hours. This is caused by the curing of the paint and the burning off of any oils remaining from manufacturing. Odor may also be released from finishing materials and adhesives used around the appliance. See recommended appliance break-in procedures (Section G).</td>
</tr>
<tr>
<td>Film on the glass</td>
<td>This is a normal result of the curing process of the paint and logs. Glass should be cleaned within 3 to 4 hours of initial burning to remove deposits left by oils from the manufacturing process. A non-abrasive cleaner such as gas fireplace glass cleaner may be necessary. See your dealer.</td>
</tr>
<tr>
<td>Metallic noise</td>
<td>Noise is caused by metal expanding and contracting as it heats up and cools down, similar to the sound produced by a furnace or heating duct. This noise does not affect the operation or longevity of the appliance.</td>
</tr>
<tr>
<td>Media / Rock noise</td>
<td>There may be some “cracking” noise coming from the fireplace during the first few heating and cooling cycles. This noise is associated with settling rock and some minor cracking of larger pieces of rock. This will lessen over time as the glass rock is conditioned to the heating and cooling temperature changes.</td>
</tr>
<tr>
<td>Media / Rock falling through base pan</td>
<td>It is expected that a few small pieces of rock may fall through the base pan and come to rest on the fireplace bottom. This has no affect on fireplace performance.</td>
</tr>
<tr>
<td>Is it normal to see the pilot flame burn continually?</td>
<td>In an intermittent pilot ignition system (IPI), the pilot flame should turn off when appliance is turned off. The factory supplied RC-400 has a “Pilot-on” feature labeled as cold climate.</td>
</tr>
<tr>
<td>Power Outages (battery backup)</td>
<td>This appliance can operated on battery power in the event of a power outage. To install the battery pack, the decorative front must be removed. The battery pack is shipped in the appliance manual bag (4 AA cell batteries required). Refer to Section 3.I for more details.</td>
</tr>
</tbody>
</table>

Contact your dealer for additional information regarding operation and troubleshooting. Visit www.heatnglo.com to locate a dealer.
C. Troubleshooting

With proper installation, operation, and maintenance your gas appliance will provide years of trouble-free service. If you do experience a problem, this troubleshooting guide will assist a qualified service technician in the diagnosis of a problem and the corrective action to be taken. This troubleshooting guide can only be used by a qualified service technician. Contact your dealer to arrange a service call by a qualified service technician.

Troubleshooting:

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Possible Cause</th>
<th>Corrective Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pilot won’t light, there is no noise or spark.</td>
<td>No AC power, AC/DC adaptor faulty, backup batteries (if being used) depleted, IFT-ECM slider switch in OFF position. Reset switch in off position.</td>
<td>Verify IFT-ECM slider switch is in ON or IFT-REM position. Verify AC power available to junction box. Verify AC/DC adaptor is plugged into junction box and ECM. Verify AC/DC adaptor output voltage is between 5.7-6.3 Vdc. If battery pack is used, check battery pack voltage is &gt;4.2 V (if not, replace batteries).</td>
</tr>
<tr>
<td></td>
<td>Shorted or loose connection in system wiring or wiring harness.</td>
<td>Verify system wiring configuration. Remove and reinstall wiring harness that plugs into module. Check continuity of wires in valve wiring harness. Replace any damaged components.</td>
</tr>
<tr>
<td></td>
<td>Reset switch is in the “OFF” position.</td>
<td>Toggle reset switch to “ON” position. See Figure 3.9.</td>
</tr>
<tr>
<td></td>
<td>Poor or no system ground.</td>
<td>Verify black ground wire in valve harness is connected to metal chassis of fireplace.</td>
</tr>
<tr>
<td>Pilot won’t light, module clicks but no spark 60 sec, 3 Red/1 Green Lockout.</td>
<td>Incorrect wiring.</td>
<td>Verify ‘S’ (White) sense wire and ‘I’ (orange) ignitor wire are connected to correct terminals on IFT-ECM.</td>
</tr>
<tr>
<td></td>
<td>Loose connections or electrical shorts in wiring.</td>
<td>Verify no loose connections or electrical shorts in wiring from module to pilot assembly. Verify wire insulation is not damaged. Verify wires are not grounding out to chassis, pilot burner, or any other metal object. Replace any damaged wires.</td>
</tr>
<tr>
<td></td>
<td>Ignitor gap is too large.</td>
<td>Verify spark gap is approximately 0.095” (2.41 mm) to 0.135” (3.43 mm).</td>
</tr>
<tr>
<td>Pilot won’t light, there is no noise or spark, 2 Red/1 Green Lockout.</td>
<td>Pilot solenoid not detected.</td>
<td>Check if valve harness orange wire is connected to pilot solenoid valve. Check pilot solenoid resistance, nominal is 40 ohms. If open or shorted, replace valve. Check valve harness wire continuity, if open replace 6-pin harness.</td>
</tr>
<tr>
<td>Pilot won’t light, there is no noise or spark, 2 Red/2 Green Lockout.</td>
<td>Spark coil failure.</td>
<td>Replace ECM.</td>
</tr>

</tbody>
</table>
6 Reference Materials

A. Accessories
Install approved accessories per instructions included with accessories.
Contact your dealer for a list of approved accessories.

**WARNING! Risk of Fire and Electric Shock!** Use ONLY Hearth & Home Technologies-approved optional accessories with this appliance. Using non-listed accessories could result in a safety hazard and will void the warranty.

**Remote Controls, Wall Controls and Wall Switches**
After a qualified service technician has installed the remote control, wall control or wall switch, follow the instructions supplied with the control installed to operate your fireplace:
For safety:
- Install a switch lock or a wall/remote control with child protection lockout feature.
- Keep remote controls out of reach of children.
See your dealer if you have questions.

**Required Decorative Front / Surround**
This appliance requires a Surround/Decorative Front. For available options, consult your dealer.

**WARNING! Risk of Fire!** Install ONLY doors or fronts approved by Hearth & Home Technologies. Unapproved doors or fronts may cause fireplace to overheat.

This fireplace has been supplied with an integral barrier to prevent direct contact with the fixed glass panel. **DO NOT operate the fireplace with the barrier removed.**
Contact your dealer or Hearth & Home Technologies if the barrier is not present or help is needed to properly install one.
For more information refer to the instructions supplied with your decorative front.

**Required Media**
The COSMO-IFT model requires media to be used per the media installation instructions. See your dealer for details.

**WARNING! Risk of Explosion!** Follow glass rock media placement instructions. **DO NOT place glass rock media directly over burner ports.** Improperly placed glass rock media interfere with proper burner operation.

**Log & Stone Options**
Contact your dealer for a list of approved accessories.
## B. Service Parts

### IMPORTANT: THIS IS DATED INFORMATION. Parts must be ordered from a dealer or distributor. 
**Hearth and Home Technologies does not sell directly to consumers.** Provide model number and serial number when requesting service parts from your dealer or distributor.

**Service Parts**

**COSMO-I30-IFT, COSMO-I35-IFT**

Beginning Manufacturing Date: March 2019

Ending Manufacturing Date: Active

**#11 Valve Assembly**

- **11.1** Pilot Assembly NG
- **11.2** Pilot Assembly Propane
- **11.3** Pilot Gasket
- **11.4** Flex Ball Valve Assembly
- **11.5** Valve NG
- **11.6** Valve Propane
- **11.7** Male Connector
- **11.8** Male Connector Plate
- **11.9** Gasket, Valve Plate
- **11.10** Gasket, Bulkhead
- **11.11** Bulkhead w/Flex Tube
- **11.12** Orifice NG (#38C)
- **11.13** Orifice Propane (#.058)
- **11.14** Orifice NG (#37C)
- **11.15** Orifice Propane (#1.55)

**#12 Component Tray**

- **12.1** Component Heat Shield
- **12.2** Module, B Type AC
- **12.3** Module, IFT Control
- **12.4** Module, RF FCC
- **12.5** Harness, IFT 6 Pin Wiring
- **12.6** Transformer, 6 Volt Wall
- **12.7** Jumper Wire, 36” Male/Female
- **12.8** Tray, Component
- **12.9** Wire Tray
- **12.10** Wall Switch Jumper Wire
- **12.11** Cable, B Type AC Module

**Stocked at Depot**
