Imagine. Design. Build.

Denali Custom Homes uses an artistic approach to building design. They are dedicated to discovering their client's personality, style, and needs at the forefront, resulting in a home that is uniquely different— a distinctive and genuine reflection of the homeowner's dreams realized.

The Boulder Circle home is a stunning modern mountain style six-bedroom home on the shores of Lake Minnetonka. The home takes advantage of its stunning lake views with walls of windows and a mix of outdoor decks, patios and porches that truly blur the lines between inside and out.

Anchoring each of the home's main living spaces is a Heatilator fireplace. The stunning six-foot-wide fireplace and its metal riveted accent wall in the main living space, the slightly subtler five-foot linear fireplace with stack stone surround in the walkout gathering room, and the more rustic wood burning outdoor fireplace on the screen porch all enhance the charm and character of this stunning home.

"Fireplaces make a home come alive and are a great way to bring individual character into each home and space," says David Bieker, president of Denali Custom Homes. "We try to give each and every one of our clients a building experience that delivers their one-of-a-kind home; at Denali Custom Homes no two homes will ever be alike."
